Fredrik Logevall's Embers of War is not the first book I've read about the First Indochina War. However, it is the first book that doesn't deal specifically with the infamous 1954 battle of Dien Bien Phu, which pitted the dying empire of France against the insurgent-nationalist Viet Minh.

WINNER OF THE PULITZER PRIZE Written with the style of a great novelist and the intrigue of a Cold War thriller, Embers of War is a landmark work that will forever change your understanding of how and why America went to war in Vietnam. Tapping newly accessible diplomatic archives in several nations, Fredrik Logevall traces the path that led two Western nations to tragically lose their way in the jungles of Southeast Asia. He brings to life the bloodiest battles of France's final years in Indochina and shows how, from an early point, a succession of American leaders made disastrous policy choices that put America on its own collision course with history. An epic story of wasted opportunities and deadly miscalculations, Embers of War delves deep into the historical record to provide hard answers to the unanswered questions surrounding the demise of one Western power in Vietnam and the arrival of another. Eye-opening and compulsively readable, Embers of War is a gripping, heralded work that illuminates the hidden history of the French and American experiences in Vietnam. ONE OF THE MOST ACCLAIMED WORKS OF HISTORY IN RECENT YEARS Winner of the Francis Parkman Prize from the Society of American Historians Winner of the American Library in Paris Book Award Winner of the Council on Foreign Relations Arthur Ross Book Award Finalist for the Cundill Prize in Historical Literature NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post The Christian Science Monitor The Globe and Mail A balanced, deeply researched history of how, as French colonial rule faltered, a succession of American leaders moved step by step down a road toward full-blown war. BSFA Award-winning author Gareth L. Powell delivers an explosive conclusion to his epic Embers of War trilogy. Low on fuel and hunted by the Fleet of Knives, the sentient warship Trouble Dog follows a series of clues that lead her to the Intrusion--an area of space where reality itself becomes unstable. But with human civilisation crumbling, what difference can one battered old ship have against an invincible armada? Meanwhile, Cordelia Pa and her step-brother eke out their existence salvaging artefacts from an alien city. But when Cordelia starts hearing the city's song in her head, strange things start happening around her. What extraordinary affinity does she have for this abandoned technology, and how can it possibly help the Trouble Dog? Award-winning author Gareth L. Powell delivers an explosive conclusion to his epic Embers of War trilogy.

In 1944, as waves of German ninjas parachute into Kent, Britain's best hopes for victory lie with a Spitfire pilot codenamed "Ack-Ack Macaque." The trouble is, Ack-Ack Macaque is a cynical, one-eyed, cigar-chomping monkey, and he's starting to doubt everything, including his own existence. A century later, in a world where France and Great Britain merged in the late 1950s and nuclear-powered Zeppelins circle the globe, ex-journalist Victoria Valois finds herself drawn into a deadly game of cat and mouse with the man who butchered her husband and stole her electronic soul. Meanwhile, in Paris, after taking part in an illegal break-in at a research laboratory, the heir to the British throne goes on the run. And all the while, the doomsday clock ticks towards Armageddon.

"Masterful. . . . Logevall presents a vivid and tragic portrait of the elements of U.S. decision-making on Vietnam from the beginning of the Kennedy administration through the announcement of the American ground war in July 1965. In the process he reveals a troubling picture of top officials in both the Kennedy and Johnson administrations persisting in efforts to boost the fortunes of successive governments of South Vietnam, even while they acknowledged that their chances for success were remote. In addition, he places the decision-making squarely in the international context."—Robert D. Schulzinger, author of *A Time for War: The United States and Vietnam, 1941-1975* "Stunning in its research and highly sophisticated in its analysis, *Choosing War* is far and away the best study we have of Lyndon Johnson's escalation of the conflict in Vietnam."—George C. Herring "In this fine book, Fredrick Logevall offers the first detailed examination of why diplomacy failed to head off the Vietnam War. Grounding himself in documentary research and other sources from several countries, Logevall comes closer than anyone ever has to explaining what happened. His clear writing and deep analysis may well change our understanding of Vietnam as a quagmire."—John Prados, author of *The Hidden History of the Vietnam War* "A rising star among a new generation of historians, Fredrik Logevall has written the most important Vietnam book in years. By explaining the international context of that tragic conflict, *Choosing War* provides startling answers to the question, Why did the war happen? Controversial yet fair, this account challenges the reader to think through John F. Kennedy's and Lyndon B. Johnson's individual responsibility for Vietnam. The effect is compelling, unforgettable history."—Timothy Naftali, co-author of *"One Hell of a Gamble:" Khrushchev, Castro, and Kennedy, 1958-1964*

From award-winning author Gareth L. Powell, the second book in the critically acclaimed Embers of War space opera series. The former warship Trouble Dog and her crew follow a distress call from the human starship Lucy's Ghost, whose crew have sought refuge aboard an abandoned generation ship launched ten thousand years before by an alien race. However, the enormous vessel contains deadly secrets of its own. The Marble Armada calls for recovered war criminal Ona Sudak to accompany its ships as it spreads itself across the Human Generality, enforcing the peace with overwhelming and implacable force. Then Sudak's vessel intercepts messages from the House of Reclamation and decides the Trouble Dog has a capacity for violence which cannot be allowed to endure. As the Trouble Dog and her crew fight to save the crew of the Lucy's Ghost, the ship finds herself caught between chaotic alien monsters on one side, and on the other, destruction at the hands of the Marble Armada.

Why did the US make a commitment to an independent South Vietnam? Could a major war have been averted? Fredrik Logevall provides a concise, comprehensive and accessible introduction to the origins of the Vietnam War from the end of the Indochina War in 1954 to the eruption of full-scale war in 1965, and places events against their full international background.

In order to hide from his unwanted fame as the spitfire-pilot-monkey who emerged from a computer game to defeat the nefarious corporation that engineered him, the charismatic and dangerous Ack-Ack Macaque is working as a pilot on a world-circling nuclear-powered Zeppelin. But when the cabin of one of his passengers is invaded by the passenger's own dying doppelganger, our hirsute hero finds himself thrust into another race to save the world—this time from an aggressive hive mind, time-hopping saboteurs, and an army of homicidal Neanderthal assassins!

More mercenaries, hired by the Allied Mercenary Command itself, land on Hall. They believe the Tigers' employer to be league with the Word of Blake, a shadowy interstellar organization that worships technology, and which has been building its own empire among the worlds around Terra. The Tigers want nothing of this battle, but war rages across the Inner Sphere. The hard-fought cease-fire cannot last, even on Hall, and when every faction is embittered and fueled by fervor, peace has no chance at all. As a new conflict erupts, will the Stealthy Tigers' BattleMechs be enough to save them? Or will the looming threat of renewed war engulf them in its fiery embrace?
