The Americas had two indigenous species of strawberry. In South America, the Mapuches of Chile cultivated *Fragaria chiloensis* more than 1,000 years ago. The Mapuches ate the strawberry fresh and dried, drank it as juice, and used it as medicine to treat indigestion, diarrhea, and bleeding.

Asia, jasmine has been cultivated since the time of Christ. Jasmine spread from Asia throughout the Old World by antiquity. In Africa, superstition attended the cultivation of jasmine. Some Africans believed that the species *Jasminum angulare* protected one from lightning. Kenyans made the stems of jasmine plants into rope.

Encyclopedia of Cultivated Plants: From Acacia to Zinnia Editor: Cumo, Christopher Publication Year : 2013 Publisher : ABC-CLIO ISBN : 978-1-59-884774-1 Category : Science - Botany Image Count : 103 Book Status: Pending Predicted Release Month: Table of Contents

Readers of this expansive, three-volume encyclopedia will gain scientific, sociological, and demographic insight into the complex relationship between plants and humans across history.

The Encyclopedia of Cultivated Palms is the definitive account of all palms that can be grown for ornamental and economic use. Palms are often underutilized as a result of their unfamiliarity\u2014even to tropical gardeners. To help introduce these valuable plants to a new audience, the authors have exhaustively documented every genus in the palm family. 825 species are described in detail, including cold hardiness, water needs, height, and any special requirements. Generously illustrated with more than 900 photos, including photos of several palm species that have never before appeared in a general encyclopedia, The Encyclopedia of Cultivated Palms is as valuable as an identification guide as it is a practical handbook. Interesting snippets of history, ethnobotany, and biology inform the text and make this a lively catalog of these remarkable plants.

Comprising three volumes and approximately half a million words, this work is likely the most comprehensive reference of its kind, providing detailed information not only about specific plants and food crops such as barley, corn, potato, rice, and wheat, but also interdisciplinary content that draws on the natural sciences, social sciences, and humanities.

Comprising three volumes and approximately half a million words, this work is likely the most comprehensive reference of its kind, providing detailed information not only about specific plants and food crops such as barley, corn, potato, rice, and wheat, but also interdisciplinary content that draws on the natural sciences, social sciences, and humanities.

Readers of this expansive, three-volume encyclopedia will gain scientific, sociological, and demographic insight into the complex relationship between plants and humans across history.

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Approximately 890 species in the palm family are detailed, including necessary information like cold hardiness, water needs, height, and any special requirements.

This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.
