Writing skills are high on the list of real-world requirements for all studentsOincluding science students. Every scientific discipline needs professionals who can ably communicate in writing. Scientists must be able to describe their proposed studies for funding considerations, track their observations and results in their own notes, describe their experimental protocols for their peers to replicate, and synthesize their work to the wider world community."

This book, first published in 1988, brings together for the first time a comprehensive, analytical and annotated bibliography of all American Accounting Works up to 1820. The discussion extends, clarifies and corrects our knowledge of early American publications on accounting. All known printings are listed including many heretofore overlooked and hard-to-find accounting treatments. Each work is reviewed and many illustrations are provided including the title pages of the first printing of every item. The reviews represent the first modern analyses of these early accounting writings and the illustrations are often the first ever published.

The system combines elements of a wishlist, a to-do list, and a diary. It makes it easy to get thoughts out of your head and onto paper, to see them clearly and decide what to do about them

It describes each strategy and clarifies its advantages and drawbacks. Also included is a large sample of classroom-tested examples along with sample student responses. These examples can be used "as is" - or you can customize them for your own class. This book will help prepare your students for standardized tests that include items requiring evidence of conceptual understanding. The strategies reflect the assessment Standards benchmarks established by the NCTM. In addition, an entire chapter is devoted to help teachers use these assessments to arrive at their students' grades.
