This is a comprehensive list of all Enroute, Plotting and Area charts that are contained within Jeppesen Standard Airway Manual. The charts in your manual will depend on the service to which you subscribe. This Enroute/Plotting/Area chart list uses the revision date to confirm the currency of each chart. When checking the dates on the Enroute/Plotting/Area chart list, the date listed should correspond to the most current (latest) revision date on your chart.

Jeppesen Charts - Enroute - YouTube

Jeppesen Enroute Charts are compiled and constructed using the best available aeronautical and topographical reference charts. Most Jeppesen Enroute Charts use the Lambert Conformal Conic projection. The design is intended primarily for airway instrument navigation to be referenced to cockpit instruments. Charts are identified by code letters for world areas covered by a series, by parenthetical letters for the altitude coverage, and by numbers for the individual chart.

Jeppesen's global enroute charts are now available in ForeFlight Mobile for all customers who have purchased or linked Jeppesen chart coverages. No matter what Jeppesen coverage you have, you can download the entire set of global VFR and IFR enroute charts, at no additional cost and with no setup or configuration required.

The updated 11th edition of the Aeronautical Chart User's Guide by the FAA is a great reference for novice pilots and professionals alike. Printed in full color with detailed examples, this book provides all the information students and pilots need to know about all the symbols and information provided on US aeronautical charts and chart navigation publications. Readers will find information on VFR charts, aeronautical chart symbols, helicopter route charts, flyway planning charts, IFR enroute charts, explanation of IFR enroute terms and symbols, Terminal Procedure Publications (TPPs), explanation of TPP terms and symbols, airspace classifications, and an airspace class table.

Plane crashes... by the hundreds. This was not a safe business. There was nothing to copy, no one to learn from. Nobody knew about metal fatigue and G forces. Nobody knew what damage hail could do to an airplane flying at 120 mph. Nobody knew what turbulence could do to an airplane. Nobody knew icing would kill the lift on wings. There were no gyro's, no instruments, no navigation facilities, no beacons, no rules, no regulations, no aircraft standards and no airports in the early days. Just young men and their flying machines that would bet their lives to pioneer a mega billion dollar industry.

Ernest K. Gann's classic memoir is an up-close and thrilling account of the treacherous early days of commercial aviation. In his inimitable style, Gann brings you right into the cockpit, recounting both the triumphs and terrors of pilots who flew when flying was anything but routine.
