MRCP SCE in Respiratory Medicine: 300 SBAs is the ideal revision guide for candidates preparing for the MRCP SCE in respiratory medicine. The book offers a wealth of practice questions that test candidates' knowledge and understanding of the clinical sciences relevant to specialist medical practice. Chapters follow the JRCPTB specialty training curriculum for respiratory medicine, while detailed answers and explanations reinforce understanding. This book provides essential revision to maximise chances of exam success. Key points 300 SBA questions with correct answers and thorough explanations, and rational clarification of incorrect options Number of questions for each part of the syllabus follows MRCP(UK) blueprint, ensuring effective targeted revision Gives practical advice on how to approach revision and useful tips to improve exam technique

This edition integrates self-test questions, illustrations, and detailed explanations, as well as provides new material on sleep disordered breathing, the newer methods of staging of lung cancer, interstitial lung diseases, and infections.

The Oxford Textbook of Obstetrics and Gynaecology is an up-to-date, objective and readable text that covers the full speciality of Obstetrics and Gynaecology. This comprehensive and rigorously referenced textbook will be a vital resource in print and online for all practising clinicians. Edited by a team of four leading figures in the field, whose clinical and scientific backgrounds collectively cover the whole spectrum of Obstetrics and Gynaecology with particular expertise in fetomaternal medicine and obstetrics, gynaecological oncology, urogynaecology, and reproductive medicine, the textbook helps inform and promote evidence-based practice and improve clinical outcomes worldwide across all facets of the discipline. The editors are supported by contributors who are internationally renowned specialists and ensure high quality and global perspective to the work. Larger sections on the Basics in Obstetrics and Gynaecology, Fetomaternal medicine, Management of Labour, Gynaecological problems, Gynaecological oncology are complimented by specialist sections on areas such as Neonatal Care & Neonatal Problems, Reproductive medicine, and Urogynaecology and Pelvic Floor Disorders to name a few. The evidence-based presentation of current diagnostic and therapeutic methods is complemented in the text by numerous treatment algorithms, giving the reader the knowledge and tools needed for effective clinical practice. The Oxford Textbook of Obstetrics and Gynaecology is essential reading for specialist obstetricians and gynaecologists, subspecialists, and O&G trainees across the world.

Respiratory ailments are the most common reason for emergency admission to hospital, the most common reason to visit the GP, and cost the NHS more than any other disease area. This pocket-sized handbook allows instant access to a wealth of information needed in the day-to-day practice of respiratory medicine.

Newly revised by the AMA, the Graduate Medical Education Directory, 2007 - 2008 (or the "Green Book") contains extensive information on more than 8,300 residency, fellowship and combined programs in the United States, as well as residency application and career-planning resources to help in making one of the most important professional decisions that a medical student can make. In this new edition, you'll find more than 6,500 revisions, updated specialty/subspecialty information/data, including Match data and more. Other changes to this edition include: 1,200 program director changes, 240 new programs, and 90 withdrawn programs. Inside the 2007-2008 edition, you'll find: * Comprehensive GME program listings, including program director, address, phone, fax, and e-mail address * Certification requirements for 24 medical specialty boards * Teaching institutions that sponsor GME programs * Residency application and career planning resources * Expanded descriptions of GME-related organizations * Medical licensure information * A list of Canadian residency programs Purchase your copy today of this indispensable tool designed to help medical students during their search through residency programs.

UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair ' s breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “ prediction paradox ” : The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver ' s insights are an essential read.
