This book explores the history of the discovery of the expanding universe, one of the most exciting exploits in astronomy.

Since the publication of *The Savage Detectives* in 2007, the work of Roberto Bolaño (1953-2003) has achieved an acclaim rarely enjoyed by literature in translation. Chris Andrews, a leading translator of Bolaño's work into English, explores the singular achievements of the author's oeuvre, engaging with its distinct style and key thematic concerns, incorporating his novels and stories into the larger history of Latin American and global literary fiction. Andrews provides new readings and interpretations of Bolaño's novels, including *2666*, *The Savage Detectives*, and *By Night in Chile*, while at the same time examining the ideas and narrative strategies that unify his work. He begins with a consideration of the reception of Bolaño's fiction in English translation, examining the reasons behind its popularity. Subsequent chapters explore aspects of Bolaño's fictional universe and the political, ethical, and aesthetic values that shape it. Bolaño emerges as the inventor of a prodigiously effective "fiction-making system," a subtle handler of suspense, a chronicler of aimlessness, a celebrator of courage, an anatomist of evil, and a proponent of youthful openness. Written in a clear and engaging style, Roberto Bolano's Fiction offers an invaluable understanding of one of the most important authors of the last thirty years.

Explores the creation of the universe and the theory that claims the universe is expanding

"[Mackler's] teens feel lived in to me--smart, observant, but realistic in terms of their insecurities and limitations. I particularly appreciate the candid and non-judgmental way she depicts teen sensuality and female desire . . . Much to discuss here in the age of #metoo." --Gabrielle Zevin, New York Times bestselling author From Carolyn Mackler, author of the Printz Honor-winning *The Earth, My Butt, and Other Big Round Things*, comes a story of what happens when the "happily ever after" turns out to be less than perfect. It's been five months since sixteen-year-old Virginia Shreves thought her life was finally back on course: she has come to terms with who she is both inside and out, and she's even started to rebuild her relationship with her older brother Byron, whose date-rape charge completely shattered everything. But just as she's getting used to the new normal, Virginia's world turns upside down again. Sparks with boyfriend Froggy Welsh the Fourth fade, her best friend Shannon bombshells bad news, and then the police arrest Byron. As Virginia struggles to cope, she meets Sebastian, an artist with his own baggage. The pair make a pact not to share their personal dramas. But secrets have a way of coming out, and theirs have the potential to ruin everything. In this follow-up to the acclaimed *The Earth, My Butt, and Other Big Round Things*, Carolyn Mackler brings Virginia's story satisfyingly full circle in a hope-filled tale of forgiveness, love, friendship, and the beauty in life's imperfections.

Alex Robinson returns with a "spiritual sequel" to his Eisner-winning debut *Box Office Poison*! It's been 15 years since the young cast of that beloved drama has graced the stage. Now, *Our Expanding Universe* introduces another Robinson ensemble to explore how time can transform a group of friends. Marriage, children, affairs, divorce! and that's just the beginning!

In 2074, while attending the Hanover School for Expecting Teen Mothers aboard an earth-orbiting spaceship, sixteen-year-old Elvie finds herself in the middle of an alien race war and makes a startling discovery about her pregnancy.

A treasury of 125 archival articles covers more than a century of scientific breakthroughs, setbacks and mysteries and includes pieces by Pulitzer Prize-winning writers, includes Malcolm W. Browne on antimatter, James Glanz on string theory and George Johnson on quantum physics.
