**ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. --** Presents the basics of research in the social and behavioral sciences in an informative and student-friendly way. Salkind's Exploring Research, 8th edition makes research methods accessible for students. Exploring Research provides an introduction to research methods through a friendly, approachable writing style. Salkind describes how to collect and analyze data and provides thorough instruction on how to prepare and write a research proposal and manuscript. The text explores the use of electronic sources (the Internet) as a means to enhance research skills and includes discussions about scientific methods. The most common types of research models in the social and behavioral sciences are incorporated, including qualitative methods. Salkind covers the research process, problem selection, sampling and generalizability, as well as a discussion of the measurement process . Teaching & Learning Experience Personalize Learning - MySearchLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Improve Critical Thinking -- "What You'll Learn about in This Chapter" helps students organize and understand the material to be covered within the chapter. "Exercises" and "Test Yourself" sections challenge students think about and discuss chapter topics and improve their problem-solving skills. Resources in the text and online help students master the process of writing a research paper. Engage Students -- Chapter objectives, chapter quizzes, Lab Manual, and eText within MySearchLab help to engage students in the material. Explore Research -- Discussions of the research process, problem selection, sampling and generalizability, and the measurement process make research exploration accessible to students. A lab manual is included in MySearchLab to help engage students in the research process. Support Instructors -- MyTest, PowerPoints, and an instructor's manual offer additional support for instructors. Note: MySearchLab with eText does not come automatically packaged with this text. To purchase MySearchLab with eText, please visit: www.mysearchlab.com or you can purchase a valuepack of the text + MySearchLab with eText (at no additional cost). VP: 9780205239924

For courses in Experimental Methods and in Research Methods in Political Science and Sociology An informative and unimintimidating look at the basics of research in the social and behavioral sciences Exploring Research makes research methods accessible for students - describing how to collect and analyze data, and providing thorough instruction on how to prepare and write a research proposal and manuscript. Author Neil Salkind covers the research process, problem selection, sampling and generalizability, and the measurement process. He also incorporates the most common types of research models used in the social and behavioral sciences, including qualitative methods. The Ninth Edition explores the use of electronic sources (the Internet) as a means to enhance research skills, includes discussions about scientific methods, and places a strong emphasis on ethics. NOTE: This ISBN is for a Pearson Books a la Carte edition: a convenient, three-hole-punched, loose-leaf text. In addition to the flexibility offered by this format, Books a la Carte editions offer students great value, as they cost significantly less than a bound textbook.

Based on Neil J. Salkind's bestselling text, Statistics for People Who (Think They) Hate Statistics, this adapted Excel 2016 version presents an often intimidating and difficult subject in a way that is clear, informative, and personable. Researchers and students uncomfortable with the analysis portion of their work will appreciate the book?s unhurried pace and thorough, friendly presentation. Opening with an introduction to Excel 2016, including functions and formulas, this edition shows students how to install the Excel Data Analysis Tools option to access a host of useful analytical techniques and then walks them through various statistical procedures, beginning with correlations and graphical representation of data and ending with inferential techniques and analysis of variance. New to the Fourth Edition: A new chapter 20 dealing with large data sets using Excel functions and pivot tables, and illustrating how certain databases and other categories of functions and formulas can help make the data in big data sets easier to work with and the results more understandable. New chapter-ending exercises are included and contain a variety of levels of application. Additional TechTalks have been added to help students master Excel 2016. A new, chapter-ending Real World Stats feature shows readers how statistics is applied in the everyday world. Basic maths instruction and practice exercises for those who need to brush up on their math skills are included in the appendix.

Presents the basics of research in the social and behavioral sciences in an informative and student-friendly way. Salkind's Exploring Research, 8th edition makes research methods accessible for students. Exploring Research provides an introduction to research methods through a friendly, approachable writing style. Salkind describes how to collect and analyze data and provides thorough instruction on how to prepare and write a research proposal and manuscript. The text explores the use of electronic sources (the Internet) as a means to enhance research skills and includes discussions about scientific methods. The most common types of research models in the social and behavioral sciences are incorporated, including qualitative methods. Salkind covers the research process, problem selection, sampling and generalizability, as well as a discussion of the measurement process . This textbook guides students through the most basic of SPSS techniques using step-by-step descriptions, presents statistical techniques and instruction on how to conduct statistical analyses, and explains in detail how to avoid all the obstacles common in the study of statistics.

The eagerly anticipated Fourth Edition of the title that pioneered the comparison of qualitative, quantitative, and mixed methods research design is here! For all three approaches, Creswell includes a preliminary consideration of philosophical assumptions, a review of the literature, an assessment of the use of theory in research approaches, and refl ections about the importance of writing and ethics in scholarly inquiry. He also presents the key elements of the research process, giving specific attention to each approach. The Fourth Edition includes extensively revised mixed methods coverage, increased coverage of ethical issues in research, and an expanded emphasis on worldview perspectives.

A step-by-step guide to conducting a research project or thesis in Education Designed to be used during the research process, Conducting Educational Research walks readers through each step of a research project or thesis, including developing a research question, performing a literature search, developing a research plan, collecting and analyzing data, drawing conclusions, and sharing the conclusions with others. Throughout the book, Daniel J. Boudah covers all types of research (including experimental, descriptive, qualitative, group designs, and single subject designs) and helps readers link research questions to designs, designs to data sources, and data sources to appropriate analyses. Key Features Technology in Research boxes help readers take advantage of related technologies and online resources In Their Own Words sections provide tips and suggestions from students who have completed projects End-of-chapter Your Research Project in Action sections prompt students to apply what they have learned to their current research projects In-text learning aids, including chapter-opening outlines and objectives and chapter-ending summaries and discussion questions, help readers master the material

Now in its third edition, this title teaches an often intimidating and difficult subject in a way that is informative, personable, and clear.

For courses in experimental methods and research methods in the social and behavioral sciences This book presents an unimintimidating look at the basics of research, describing how to collect and analyze data and providing thorough instruction on how to prepare and write research proposals and manuscripts. It covers the research process, problem selection, sampling and generalizability, and the measurement process, as well as the most common types of research models used in the social and behavioral sciences, including qualitative methods. The 10th edition explores the use of electronic sources for research with more information about conducting research and literature reviews online and includes new information on how social media can be used in a research context and places a strong emphasis on ethics. Information about the use of the 7th Edition of the Publication Manual of the American Psychological Association is contained in several chapters. A key update in this edition is the coverage of SPSS and Excel as tools of choice for data analysis.

Understanding and Evaluating Research: A Critical Guide aims to sensitize students to the necessity of learning how not to defer to the mysterious authority of the experts, but rather to learn how to be a critical consumer of others' research, and to gain confidence in their ability to be producers of research. Sue McGregor shows students how to be research literate, and how to find, critique and apply other people's scholarship. This textbook is grounded in a solid understanding of the prevailing research methodologies for creating new knowledge (philosophical underpinnings), which in turn dictate problem posing, theory selection, and research methods (tasks for sampling, collecting and analyzing data, and reporting results).
