Becoming a great educator is a lifelong quest. This new professional resource is designed especially for Family and Consumer Sciences, Nutrition, and Wellness educators-in both formal and informal settings. Its practical approach shows how educational theory is applied in real-life settings. Creative Instructional Methods is both a methods text for preservice teachers and a handbook of fresh ideas and the latest techniques for experienced educators. Look for topics such as teaching with technology, working with at-risk and special needs learners, implementing service learning, balancing career and personal roles, growing as a professional, and building a professional portfolio. 384 pages.

"In Food Story, Elise Museles shows you how to heal your relationship with food, make nourishing choices, and feel 'in charge' of your health and your life." —Mark Hyman, MD, New York Times bestselling author of The Pegan Diet and head of strategy and innovation at the Cleveland Clinic Center for Functional Medicine Finding peace with food isn't about eating more kale, drinking more water, or doing more yoga. It's about unlocking your food story, your inner narrative about what you eat and why you eat what you do. When it comes to food, everyone has a story. The way you feel about food, think about food, deprive yourself or overindulge, the specific things you crave ... There's always a story behind it. Your food story is a big swirl of many things: how you were raised, the messages you received from influential people and absorbed from the media, your positive memories and your painful memories about food. All of it comes together to create thoughts and patterns that directly impact your health and happiness. In Food Story, certified eating psychology expert and health coach Elise Museles offers you a way out of all the stress and confusion with food, and leads you to a more joyful and relaxed way to eat, think, and live. By understanding your food story, how it formed, and how it drives your choices, you'll say goodbye to guilt and shame as you release the disempowering stories looping inside your mind. You'll finally allow food to help you live your best life—not control it. Food Story is a permission slip to love yourself, filled with juicy questions for reflection, practical tools for cultivating confidence, and grounding rituals for tuning in to your body's true needs and desires. Plus, you'll discover a fun, science-backed way to look at food with over 35 luscious recipes divided by mood. Whether it's happy, focused, radiant, strong, comforted, sensual, or calm, there are nutrients (and recipes!) to bring on that feeling! With Food Story, you'll find all the ingredients you need to banish negative self-talk, reclaim your power, and transform your relationship with food—and yourself—for good.

#1 NEW YORK TIMES BESTSELLER • OPRAH'S BOOK CLUB PICK The heartrending story of a midcentury American family with twelve children, six of them diagnosed with schizophrenia, that became science's great hope in the quest to understand the disease. "Reads like a medical detective journey and sheds light on a topic so many of us face: mental illness." —Oprah Winfrey Don and Mimi Galvin seemed to be living the American dream. After World War II, Don's work with the Air Force brought them to Colorado, where their twelve children perfectly spanned the baby boom: the oldest born in 1945, the youngest in 1965. In those years, there was an established script for a family like the Galvins—aspiration, hard work, upward mobility, domestic harmony—and they worked hard to play their parts. But behind the scenes was a different story: psychological breakdown, sudden shocking violence, hidden abuse. By the mid-1970s, six of the ten Galvin boys, one after another, were diagnosed as schizophrenic. How could all this happen to one family? What took place inside the house on Hidden Valley Road was so extraordinary that the Galvins became one of the first families to be studied by the National Institute of Mental Health. Their story offers a shadow history of the science of schizophrenia, from the era of institutionalization, lobotomy, and the schizophrenogenic mother to the search for genetic markers for the disease, always amid profound disagreements about the nature of the illness itself. And unbeknownst to the Galvins, samples of their DNA informed decades of genetic research that continues today, offering paths to treatment, prediction, and even eradication of the disease for future generations. With clarity and compassion, bestselling and award-winning author Robert Kolker uncovers one family's unforgettable legacy of suffering, love, and hope.

This revealing volume explores recent historical perspectives on the modern euthanasia and assisted-suicide debate and the political arenas in which it has unfolded. * Case studies explain contemporary legal techniques in the handling of euthanasia and assisted-suicide prosecutions, including those involving doctors, nurses, and family members * A chronology shows political events and major cases of medical euthanasia and assisted suicide over the past 100 years * A glossary explains key terms, such as "causation," "intent," "palliative care," and "double effect" * An interdisciplinary bibliography cites significant materials from the fields of history, law, and sociology, as well as major medical journal articles

Includes bibliography and indexes / subject, personal author, corporate author, title, and media index.

This readable book prepares graduate nursing students to be nurse educators in settings of staff development, patient education or academic environments, and it covers commonalities of teaching that pertain to all three.

In November 1998, millions of television viewers watched as Thomas Youk died. Suffering from the late stages of Lou Gehrig's disease, Youk had called upon infamous Michigan pathologist Dr. Jack Kevorkian to help end his life on his own terms. After delivering the videotape to 60 Minutes, Kevorkian was arrested and convicted of manslaughter, despite the fact that Youk's family firmly believed that the ending of his life qualified as a good death. Death is political, as the controversies surrounding Jack Kevorkian and, more recently, Terri Schiavo have shown. While death is a natural event, modern end-of-life experiences are shaped by new medical, demographic, and cultural trends. People who are dying are kept alive, sometimes against their will or the will of their family, with powerful medications, machines, and "heroic measures." Current research on end-of-life issues is substantial, involving many fields. Beyond the Good Death takes an anthropological approach, examining the changes in our concept of death over the last several decades. As author James W. Green determines, the attitudes of today's baby boomers differ greatly from those of their parents and grandparents, who spoke politely and in hushed voices of those who had "passed away." Dr. Elisabeth Kubler-Ross, in the 1960s, gave the public a new language for speaking openly about death with her "five steps of dying." If we talked more about death, she emphasized, it would become less fearful for everyone. The term "good death" reentered the public consciousness as narratives of AIDS, cancer, and other chronic diseases were featured on talk shows and in popular books such as the best-selling Tuesdays with Morrie. Green looks at a number of contemporary secular American death practices that are still informed by an ancient religious ethos. Most important, Beyond the Good Death provides an interpretation of the ways in which Americans react when death is at hand for themselves or for those they care about.

This unique volume outlines an empowering approach to service delivery in child abuse prevention programs. Using knowledge gained from research on 25 distinct parenting programs, the authors provide detailed case studies and dozens of practical suggestions for planning, evaluating, and strengthening parent education programming. Convenient appendices offer a sample program curriculum, targeted handouts for program personnel, and comprehensive lists of program evaluation measures.
