Presents a collection of classic and contemporary primary sources in philosophy. This work covers the main topics of Western Philosophy.

For over 2000 years, philosophy has been our best guide to the experience of being human, and the true nature of reality. From Aristotle, Plato, Epicurus, Confucius, Cicero and Heraclitus in ancient times to 17th century rationalists Descartes, Leibniz and Spinoza, from 20th-century greats Jean-Paul Sartre, Jean Baudrillard and Simone de Beauvoir to contemporary thinkers Michael Sandel, Peter Singer and Slavoj Zizek, 50 Philosophy Classics explores key writings that have shaped the discipline and had an impact on the real world. Philosophy can no longer be confined to academia, and 50 Philosophy Classics shows how powerful it can be as a tool for opening our minds and helping us think. Whether you are fascinated or daunted by the big questions of how to think, how to be, how to act and how to see, this is the perfect introduction to some of humanity's greatest minds and their landmark books.

The new edition of this introductory text presents, in an accessible way, classical and contemporary readings on topics central to and representative of all major periods of the Western philosophical tradition. The book presents 55 readings (23 of which are new to the fourth edition) on seven topics: epistemology, philosophy of religion, metaphysics, personal identity and immortality, free will and determinism, ethics, and political and social philosophy. Pedagogical features make these readings accessible and interesting to beginning students. All the introductions and biographical sketches have been revised for the fourth edition, as have the study questions and glossary. The explanatory footnotes and the stylistic modernization of texts are new to the fourth edition.

A book to challenge the status quo, spark a debate, and get people talking about the issues and questions we face as a country!

Have you ever lain awake at night worried about how we can be sure of the reality of the external world? Perhaps we are in fact disembodied brains, floating in vats at the whim of some deranged puppetmaster. If so, you are not alone--and what's more, you are in exalted company--for this question and other ones like it have been the stuff of philosophical rumination from Plato to Popper. In a series of accessible and engagingly written essays, 50 Philosophy Ideas You Really Need to Know introduces and explains the problems of knowledge, consciousness, identity, ethics, belief, justice, and aesthetics that have engaged the attention of thinkers from the era of the ancient Greeks to the present day.

The twentieth century has witnessed an unprecedented 'crisis in the foundations of mathematics', featuring a world-famous paradox (Russell's Paradox), a challenge to 'classical' mathematics from a world-famous mathematician (the 'mathematical intuitionism' of Brouwer), a new foundational school (Hilbert's Formalism), and the profound incompleteness results of Kurt Gödel. In the same period, the cross-fertilization of mathematics and philosophy resulted in a new sort of 'mathematical philosophy', associated most notably (but in different ways) with Bertrand Russell, W. V. Quine, and Gödel himself, and which remains at the focus of Anglo-Saxon philosophical discussion. The present collection brings together in a convenient form the seminal articles in the philosophy of mathematics by these and other major thinkers. It is a substantially revised version of the edition first published in 1964 and includes a revised bibliography. The volume will be welcomed as a major work of reference at this level in the field.

We all want to live a joyful life, sharing our unique gifts, and presenting our best selves to the world. Too often, however, we get bogged down in apathy, anger, and self-defeating thoughts and behaviors. The key to a Balanced Soul is personal exploration, expression, and acceptance. In this enlightening book, licensed psychotherapist Sonia Abel presents 52 easy to use practices that she has learned and used herself, both on her own journey of spiritual and personal growth, as well as with her clients as a transpersonal therapist. Practices such as: What is Karma Teaching You?, Cultivating Compassion for Yourself, and Understanding your Shadow can help you explore and understand yourself so that you can let go of self-defeating behaviors and practice new, more life-affirming ones. "When we actually allow ourselves to feel and respect our feelings, we open up to the cathartic release and insights of healing. We realize that we're going to survive, and spiritual practice helps us believe that we can and will thrive! Transcendent experiences like meditation and reverence for nature give us the gift of knowing that we can rise above (transcend) the limiting beliefs about ourselves, the pain and alienation of everyday life, and become our Best Selves. Transcendent experiences become transcendent beliefs; they take us beyond what we thought was possible." - From the Introduction
