The future of the U.S. Supreme Court hangs in the balance like never before. Will conservatives or liberals succeed in remaking the court in their own image? In *A Constitution of Many Minds*, acclaimed law scholar Cass Sunstein proposes a bold new way of interpreting the Constitution, one that respects the Constitution's text and history but also refuses to view the document as frozen in time. Exploring hot-button issues ranging from presidential power to same-sex relations to gun rights, Sunstein shows how the meaning of the Constitution is reestablished in every generation as new social commitments and ideas compel us to reassess our fundamental beliefs. He focuses on three approaches to the Constitution--traditionalism, which grounds the document's meaning in long-standing social practices, not necessarily in the views of the founding generation; populism, which insists that judges should respect contemporary public opinion; and cosmopolitanism, which looks at how foreign courts address constitutional questions, and which suggests that the meaning of the Constitution turns on what other nations do. Sunstein demonstrates that in all three contexts a "many minds" argument is at work--put simply, better decisions result when many points of view are considered. He makes sense of the intense debates surrounding these approaches, revealing their strengths and weaknesses, and sketches the contexts in which each provides a legitimate basis for interpreting the Constitution today. This book illuminates the underpinnings of constitutionalism itself, and shows that ours is indeed a Constitution, not of any particular generation, but of many minds.

OC [A leading French Christian writer,] Guillebaud leads the search for the Greek, Jewish and Christian roots of our fundamental Western values. . . an erudite and frank analysis of the perverse trends that undermine morality today and calls for a revolutio"

Excellent book for those exploring religion, or for that matter skeptics. Christian and Roman/Greco history for years, it is a great read for those who are questioning any religion that has been forced upon them or questioning religion in any way. This book includes religious aspects such as the invention of Christianity for political purposes in and around 325 CE, ordered by Emperor Constantine, accomplished by his friend Eusebius (Bishop of Caesarea in Palestine, described as "the first thoroughly dishonest historian of antiquity.") The myth of Mithras was used as the model for the fable of Christ (Mithras, Krishna, Osiris, Attis of Phygia, Dionysus, all were born on December 25th from a virgin mother, died and were resurrected, except for Mithras, who ascended directly without dying!). Outrageous forgeries and fraud are exposed. After 325 A.D., destruction of previous conflicting documents and edifices followed, including the destruction of the Great Library of Alexandria.

The ultimate history Bundle for all Americans and people who take interest in American history. From Native Americans to America today, its founding fathers and constitution, embark on a journey that reveals the mistakes that tore a continent apart, as well as the triumphs that rebuilt it. ===== American History: US History: An Overview of the Most Important People & Events. The History of United States: From Indians, to "Contemporary" History ... Native Americans, Indians, New York Book 1) Final edition - complete with maps, illustrations and eyewitness accounts The story of how a handful of explorers and settlers grew into one of the world's greatest nations. Meet the leaders that founded and shaped a great nation. But, this short introduction to American History doesn't stop at who and when. It follows the rollercoaster of events to also show you how and why: Columbus' discovery of an uncharted continent led to rapid colonization by Spanish and European nations. Fierce competition between the Spanish, French, English, and Portuguese divided the North American landmass into multiple territories. A series of great leaders founded a democracy that has withstood centuries of peace and turmoil. War, tragedy, and famine shaped the United States into a modern superpower. The United States Constitution continues to guide and shape the nation today. The major political parties of the past shaped the modern Republican and Democratic parties.

===== Native Americans: American History: An Overview of "Native American History" - Your Guide To: Native People, Indians, & Indian History (North American ... Wars, Native American Culture Book 1) 3rd edition - complete with expanded and brand new content Discover a history you never knew! Rights, Declaration of Independence Book 1) Follow the tragedies and triumphs of the great leaders that fought for independence on the battlefield and in political arenas. See what happens when leaders who choose to fight for freedom struggle, persevere and emerge victorious. Learn how hard-won liberty became a solid foundation for a young nation built on the central ideas of its founders.

Imagine a country in which strikes by public-sector unions occupied the public square; where foreign policy wandered aimlessly as America disentangled itself from wars abroad and a potential civil war on its southern border; where racial and ethnic groups jostled for political influence; where a war on illicit substances led to violence in its cities; where technology was dramatically changing how mankind communicated and moved about—and where the educated harbored increasing contempt for the philosophic underpinnings of our republic. That country, the America of the 1920s, looked a lot like America today. One would think, then, that the President who successfully navigated these challenges, Calvin Coolidge, might be esteemed today. Instead, Coolidge's record is little known, the result of efforts by both the left and right to distort his legacy. *Why Coolidge Matters* revisits the record of our most underrated president, examining Coolidge's views on governance, public sector unions, education, race, immigration, and foreign policy. Most importantly, *Why Coolidge Matters* explains what lessons Coolidge—the last president to pay down the national debt—can offer the limited government movement in the post-industrial age.

Peter Thomas has lived a tremendously successful and fulfilling life, despite personal tragedy and occasionally grave financial circumstances. He founded and built Century 21 Real Estate into the largest real estate network in Canada, and profitably spearheaded dozens of large-scale real estate developments all over North America. He has founded several more wildly successful businesses, the not-for-profit organizations LifePilot and the Todd Thomas Institute for Values-Based Leadership, flown a helicopter, dived to 850 feet in a submarine, and raced motorcycles. So why him? Peter Thomas doesn't believe he is a particularly gifted person or any smarter than the average man or woman in the street, but his achievements in business and philanthropy are world class. So what is the secret to building an exceptional life? The answer is that there are many paths to success, but what they all have in common is being true to the people on them, and you get to – have to – pick your own. Thomas shares his life, experience, and wisdom with you to illustrate his Five Foundations for achieving the life you want: Values: Clarify your personal values and live them. Focus: Understand the power of focus and how to apply it. Visualization: If you can picture your goal, you can work towards it. Inspiration: Celebrate the genius within you. Reflection: Tap into positive forces you control. For Peter Thomas, learning and applying these principles has brought him fame and fortune, aligned with a resolute conviction to help the less fortunate. There is no limit to what we are capable of achieving. *Be Great* is a manual for unlocking human potential.

Edited by Marianne Sawicki. Translated by Mary Catharine Baseheart and Marianne Sawicki. Edith Stein's analysis of the interplay between the philosophy of psychology and cultural studies, particularly psychoanalytic theory and behaviorism. "Do I have to?" is the most human of all questions. Children ask it when told to go to sleep. Adults ponder it when faced with the demands of the workplace, the family, or their own emotions and addictions. We find ourselves always poised between freedom and necessity. In this volume, her most profound and carefully argued phenomenology of human creativity, Edith Stein explores the interplay of causal constraints and motivated choices. She demonstrates that physical events and physiological processes do not entirely determine behavior; the energy deployed for living and creativity exceeds what comes to us through physical means. The human body is a complex interface between the material world and an equally real world of personal value. The body opens as well to community. Stein shows that, strictly speaking, there is no such thing as a solitary human being. Communities are reservoirs of the meaning and value that fuel both our everyday choices and our once-in-a-lifetime accomplishments. This basic fact, she argues, is the starting point for any viable political or social theory. The two treatises in this book comprise her post-doctoral dissertation that Stein wrote to qualify for a teaching job at a German university just after the First World War. They ring with the joy, hope, and confidence of a brilliant young scholar. Today they continue to challenge the major schools of twentieth-century psychology and cultural studies, particularly psychoanalytic theory and behaviorism. Here, too, is the intellectual manifesto of a woman who would go on to become a Christian and a Carmelite nun, only to be killed at Auschwitz like so many others of Jewish ancestry.

YOUR ONLY JOB AS A LEADER IS TO MAKE SURE MONDAY MORNING DOESN'T SUCK. At least that's what Eric Harkins thinks. In his first book, Eric talks about his twenty-five-year journey working in corporate America and the many lessons he learned about leadership. He was lucky enough to work for a company that made sure Monday morning didn't suck, but even luckier to work for several that didn't. *Great Leaders Make Sure Monday Morning Doesn't Suck* is a fun, engaging, and light-hearted collection of stories told by Eric. He's worked for some good leaders. He's worked for some bad leaders. And he learned a lot about what it takes to create a culture high performers want to be a part of.

From the leading authority on marijuana—a man who has served as White House advisor on drugs to three different administrations and who NBC News once called “the prodigy of drug politics”—comes the remarkable and shocking exposé about how 21st century pot, today's new and highly potent form of the drug, is on the rise, spreading rapidly across America by an industry intent on putting rising profits over public health. *Smokescreen: What the Marijuana Industry Doesn't Want You to Know* examines the inside story behind the headlines, containing accounts from Sabet's time in the Obama administration to stunning revelations from whistleblowers speaking out for the first time. What it finds is how the marijuana industry is running rampant without proper oversight, leaving Americans' health seriously at risk. Included are interviews with industry insiders who reveal the hidden dangers of a product they had once worshipped. Also contained in these pages are insights from a major underground-market dealer who admits that legalization is hastening the growth of the illicit drug trade. And more to the heart of the issue are the tragic stories of those who have suffered and died as a result of marijuana use, and in many cases, as a result of its mischaracterization. Readers will learn how power brokers worked behind the scenes to market marijuana as a miracle plant in order to help it gain widespread acceptance and to set the stage for the lucrative expansion of recreational pot. The author of this compelling first-person narrative leading the national fight against the legalization of cannabis through his nonprofit, *Smart Approaches to Marijuana* (aka SAM) is Kevin Sabet. As a policy advisor to everyone from county health commissioners to Pope Francis, and a frequent public speaker on television, radio and through other media outlets, his analysis is consistently relied upon by those who recognize what's at stake as marijuana lobbyists downplay the risks of massive commercialization. A book several years in the making, filled with vivid characters and informed by hundreds of interviews and scores of confidential documents, Sabet's *Smokescreen* lays bare the unvarnished truth about marijuana in America.
