A study of human physiology. The beginning chapters introduce basic chemical and biological concepts, and the chapters that follow promote conceptual understanding rather than rote memorization of the facts. Topics new to this edition include neural stem cells, integrins and taste cells.

Since publication in 1999, the first edition of Introduction to Biomedical Engineering has dominated the market of biomedical engineering texts. Under the direction of John Enderle, Susan Blanchard and Joe Bronzino, leaders in the field have contributed chapters on the most relevant subjects for biomedical engineering students. These chapters coincide with courses offered in all biomedical engineering programs so that it can be used at different levels for a variety of courses of this evolving field. Both Enderle and Blanchard are on the Accreditation Board for Engineering and Technology (ABET), the body that sets the standard for US-based engineering programs. These standards have been used as a guideline for examples and pedagogy. New to this edition: Computational Biology, Medical Imaging, Genomics and Bioinformatics. - 60% update from first edition to reflect the developing field of biomedical engineering. - Pioneer title in the Academic Press Series in Biomedical Engineering - Over 4,000 units of first edition sold - MatLab examples included in every chapter

A Laboratory Guide to Human Physiology, Twelfth Edition, is a stand-alone human physiology manual that can be used in conjunction with any human physiology textbook. It includes a wide variety of exercises that support most areas covered in a human physiology course, allowing instructors the flexibility to choose those exercises best suited to meet their particular instructional goals. Background information that is needed to understand the principles and significance of each exercise is presented in a concise manner, so that little or no support is needed from the lecture text.

Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and speciality practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world. Increased emphasis on practice tips to help nurses care for patients within critical care Updated case studies, research vignettes and learning activities to support further learning Highlights the role of the critical care nurse within a multidisciplinary environment and how they work together Additional resources on Evolve An eBook on VitalSource Instructor resources Case Study suggested responses Learning Activity suggested responses Additional Case Study answers Image collection, including tables Student resources Additional Case Studies Weblinks Increased global considerations relevant to international context of critical care nursing alongside its key focus within the ANZ context Aligned to update NMBA RN Standards for Practice and NSQHS Standards An eBook included in all print purchases

A firm grasp of the functions of living organisms is one of the most important prerequisites to pharmacy study. The long-awaited second edition of Essentials of Human Physiology presents concepts in physiology in a way that prepares students for their subsequent study of pathophysiology, pharmacology, and pharmacotherapeutics. Thoroughly

Health assessment is central to effective planning, implementationand evaluation of nursing care. All nurses are accountable for thecare they provide and need to be able to accurately determinepatient needs in order to plan and deliver evidence-based care Vital notes for nurses: Health assessment provides studentswith the knowledge required to consider the many different factorswhich can influence patient's health, comfort, well-being andrecovery and to confidently assess patient needs. Vital notes for nurses: Health assessment exploresconcepts of holism, health and illness, factors to consider whenassessing patients, communication skills needed for assessment, andall aspects of holistic assessment including physical,psychological, social, cultural and spiritual factors andnutritional needs. * Provides a concise, accessible introduction to healthassessment * Includes physical, psychological, social, cultural and spiritualhealth assessment * Explores essential concepts in assessment and care planning * Within the Vital Notes for Nurses series * Adopts a holistic approach

With each edition, ACCCN's Critical Care Nursing has built on its highly respected reputation. Its contributors aim to encourage and challenge practising critical care nurses and students to develop world-class critical care nursing skills in order to ensure delivery of the highest quality care. Endorsed by the Australian College of Critical Care Nurses (ACCCN), this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence-based research and up-to-date advances in clinical practice, technology, procedures and standards. Expanded to reflect the universal core elements of critical care nursing practice authors, Aitken, Marshall and Chaboyer, have retained the specific information that captures the unique elements of contemporary critical care nursing in Australia, New Zealand and other similar practice environments. Structured in three sections, ACCCN's Critical Care Nursing, 3rd Edition addresses all aspects of critical care nursing, including patient care and organisational issues, while highlighting some of the unique and complex aspects of speciality critical care nursing practice, such as paediatric considerations, trauma management and organ donation. Presented in three sections: - Scope of Critical Care - Principles and Practice of Critical Care - Speciality Practice Focus on concepts that underpin practice - essential physical, psychological, social and cultural care New case studies elaborate on relevant care topics Research vignettes explore a range of topics Practice tips highlight areas of care particularly relevant to daily clinical practice Learning activities support knowledge, reflective learning and understanding Additional case studies with answers available on evolve NEW chapter on Postanaesthesia recovery Revised coverage of metabolic and nutritional considerations for the critically ill patient Aligned with the NEW ACCCN Standards for Practice
