From an award-winning historian, a magisterial account of the revolution that created the modern world The principles of the French Revolution remain the only possible basis for a just society -- even if, after more than two hundred years, they are more contested than ever before. In *A New World Begins*, Jeremy D. Popkin offers a riveting account of the revolution that puts the reader in the thick of the debates and the violence that led to the overthrow of the monarchy and the establishment of a new society. We meet Mirabeau, Robespierre, and Danton, in all of their brilliance and vengefulness; we witness the failed escape and execution of Louis XVI; we see women demanding equal rights and black slaves wresting freedom from revolutionaries who hesitated to act on their own principles; and we follow the rise of Napoleon out of the ashes of the Reign of Terror. Based on decades of scholarship, *A New World Begins* will stand as the definitive treatment of the French Revolution.

This fully revised second edition takes account of historical work produced during the last decade. Covering the period between Louis XIV's death in 1715 and the outbreak of the French Revolution in 1789, it discusses: * France's accomplishments in international affairs, commercial expansion, and intellectual and artistic life * the significance of long-term political, social and economic forces in causing the Revolution * how the changing perception of government, from one of divine-right kingship towards the idea of a national enterprise, ultimately undermined the old regime.

A groundbreaking study of the role of Muslims in eighteenth-century France From the beginning, French revolutionaries imagined their transformation as a universal one that must include Muslims, Europe's most immediate neighbors. They believed in a world in which Muslims could and would be French citizens, but they disagreed violently about how to implement their visions of universalism and accommodate religious and social difference. Muslims, too, saw an opportunity, particularly as European powers turned against the new French Republic, leaving the Muslim polities of the Middle East and North Africa as France's only friends in the region. In *Muslims and Citizens*, Collier examines how Muslims came to participate in the political struggles of the revolution and how revolutionaries used Muslims in France and beyond as a test case for their ideals. In his final chapter, Collier reveals how the French Revolution's fascination with the Muslim world paved the way to Napoleon's disastrous invasion of Egypt in 1798.

On 14 July 1789 thousands of Parisians seized the Bastille fortress in Paris. This was the most famous episode of the Revolution of 1789, when huge numbers of French people across the kingdom successfully rebelled against absolute monarchy and the privileges of the nobility. But the subsequent struggle over what social and political system should replace the 'Old Rgime' was to divide French people and finally the whole of Europe. The French Revolution is one of the great turning-points in history. It continues to fascinate us, to inspire us, at times to horrify us. Never before had the people of a large and populous country sought to remake their society on the basis of the principles of liberty and equality. The drama, success and tragedy of their project have attracted students to it for more than two centuries. Its importance and fascination for us are undiminished as we try to understand revolutions in our own times. There are three key questions the book investigates. First, why was there a revolution in 1789? Second, why did the revolution continue after 1789, culminating in civil war, foreign invasion and terror? Third, what was the significance of the revolution? Was the French Revolution a major turning-point in French, even world history, or instead just a protracted period of violent upheaval and warfare which wrecked millions of lives? This new edition of *The French Revolution* contains revised text and new photographs. This edition includes video footage of Peter McPhee's interviews with Professor Ian Germani, University of Regina, Saskatchewan, Canada, on the role of military discipline in the French Revolutionary Wars; Dr Marisa Linton, Kingston University in London, about her book, *Choosing Terror: Virtue, Friendship and Authenticity in the French Revolution*, a major study of the politics of Jacobinism; and Professor Timothy Tackett, University of California, Irvine, on the origins of terror in the French Revolution.
