The human eye provides a three-dimensional moving image that is normally colored during the daytime. There are many changes in the eye and its surrounding areas due to various disorders and diseases, and aging. Eye tumor, excessive tearing, dry eyes, macular degeneration, cataract, glaucoma, etc. are some of the common eye diseases caused by various internal and external factors. The aging process is one of the prominent reasons for certain changes in the eye. The most functionally important changes in the non-diseased eye are the loss of accommodation or focusing capability and a reduction in pupil size. From theories to research to practical applications, case studies related to all contemporary topics of relevance to ophthalmology have been included in this book. It presents the complex aspects of diagnosis and management of eye diseases in the most comprehensible and easy to understand language. The readers would gain knowledge that would broaden their perspective in this field of study.

Step-by-step instructions and symbol charts put these 139 creative new border designs within reach for beginning and advanced crocheters alike. If you ' re ready to chart your own crocheted course, Edie Eckman offers plenty of helpful design advice, including how to choose an appropriate border for each project and how to incorporate an element from the main stitch pattern into a new border design. She then explains, with the help of close-up photos, how the same pattern can have dramatically different results depending on the weight of the yarn. With each pattern diagrammed to approach in both rounds and rows, Every Which Way Crochet Borders is an inventive and invaluable resource.
