The Chinese Exclusion Act of 1882 made the Chinese the first immigrant group officially excluded from the United States. In *Paper Families*, Estelle T. Lau demonstrates how exclusion affected Chinese American communities and

Download File PDF Gateway Papers

initiated the development of restrictive U.S. immigration policies and practices. Through the enforcement of the Exclusion Act and subsequent legislation, the U.S. immigration service developed new forms of record keeping and identification practices. Meanwhile, Chinese Americans took advantage of the system's loophole: children of U.S. citizens were granted automatic eligibility for immigration. The result was an elaborate system of "paper families," in which U.S. citizens of Chinese descent claimed fictive, or "paper," children who could then use their kinship status as a basis for entry into the United States. This subterfuge necessitated the creation of "crib sheets" outlining genealogies and providing village maps and other information that could be used during immigration processing. Drawing on these documents as well

as immigration case files, legislative materials, and transcripts of interviews and court proceedings, Lau reveals immigration as an interactive process. Chinese immigrants and their U.S. families were subject to regulation and surveillance, but they also manipulated and thwarted those regulations, forcing the U.S. government to adapt its practices and policies. Lau points out that the Exclusion Acts and the pseudo-familial structures that emerged in response have had lasting effects on Chinese American identity. She concludes with a look at exclusion's legacy, including the Confession Program of the 1960s that coerced people into divulging the names of paper family members and efforts made by Chinese American communities to recover their lost family histories.

This book constitutes the refereed proceedings of the 4th International Conference on Coordination Languages and Models, COORDINATION 2000, held in Limassol, Cyprus in September 2000. The 18 revised full papers and nine short papers presented were carefully reviewed and selected from 52 submissions. The papers are organized in topical sections on coordination styles and trends, tuple space semantics and implementation, coordination policies, dynamics of coordination, mobility, semantic models, shifting Linda perspectives, directions in software architecture, achieving software dependability.

Two warring factions have been battling in our planet since the beginning of time. Through revolutionary advances in science, we created a gateway that could stop the last mass extinction and save us from the wrath of the gods. A desperate race to save humanity ensues, but who or what are we fighting against? Who is on our side? The connection between governments and world religions, the foundation of prophecy, and the worldwide evidence of links between our past, present, and future. The revelation could shake the foundations of your belief system.

Proponents of the gateway concept - which ties together
