With a strong focus on health and wellness, this gerontological nursing text offers you a holistic perspective to caring for older adults. Designed to facilitate the healthiest adaptation possible, this text identifies potential problems that may occur and the means to address complications, alleviate discomfort, and help older adults lead healthy lives. Disease processes are discussed in the context of healthy adaptation, nursing support, and nursing responsibilities to help you gain an understanding of your clients' experience. Focus on health and wellness establishes a positive perspective to aging. Careful attention to age, cultural, and gender differences are integrated throughout to help you understand these important considerations when caring for older adults. Healthy aging strategies maximize the healthiest behaviors of clients with dementia and their caregivers. Consistent chapter organization includes learning objectives, research, and study questions/activities to make information easy to find and use. Incorporates assessment guidelines throughout provide useful tools for practice. End-of-chapter activities and discussion questions help you expand your knowledge and understanding of the content. Resource lists provide you with additional means to explore ways to care for the older adult. Incorporates the core competencies identified by the AACN and the Hartford Foundation Institute for Geriatric Nursing. Healthy People 2010 boxes assist you in integrating knowledge about healthy aging considerations. Evidence-Based Practice boxes summarize research findings that confirm effective practices or identify practices with unknown, ineffective, or harmful effects. Expanded sexuality-related content includes older adults living with AIDS and STDs. Genetics section reflects the emergence of the role of genetics in gerontological assessment.

GERONTOLOGICAL NURSING, 3/e is a comprehensive, research-based, and up-to-date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging; healthy aging; common diseases of aging; and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence-based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses □add life to years,□ not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications; the text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long-term care, and hospice settings.

"In this book, the tools and clear presentation of information related to the actual testing process provide the learner with a framework for confidence as he or she prepares for the exam. More important, however, is the elaborate presentation of the certification content and the attention to the important physical and psychosocial elements of the human aging process." --Geraldine Bednash, PhD, RN, FAAN Executive Director American Association of Colleges of Nursing This is the only certification review for the gerontology nursing specialty exam that has it all--a comprehensive review section covering key content included on the exam, well-honed test-taking strategies, and an extensive number of exam-style questions with answers and rationales. The second edition is completely updated to mirror the new format and content of the 2015 certification exam. It now features rationales for all review questions to promote critical thinking and includes new or expanded sections on health promotion and person-centered care, state-of-the-art drug information, and instruction on leadership, management, patient education, and population health. Concise and to the point, this resource contains all of the information required for test success, including step-by-step directives on how to best prepare for the certification exam, a meticulous content review presented according to the test blueprint, and 500 questions with answers and rationales that mirror the type of questions included on the exam. The dissection and analysis of a variety of questions likely to appear reinforce crucial test-taking strategies, and clues for memorizing information and tips for prioritizing answers offer additional tactics for exam success. An unrivalled resource for test preparation, the book will also be useful for students and teachers of gerontology and practicing nurses working with older adults. Key Features: Mirrors the new 2015 certification test plan Provides expanded content on health promotion and person-centered care Offers updated information on new medications and treatments Presents new content on leadership, management, patient education, and population health New to the second edition, are rationales for all 500 questions

CORE CURRICULUM FOR GERONTOLOGICAL NURSING helps nurses prepare for the American Nurses Credentialing Center (ANCC) examination for the gerontologic nurse. Content is based on the format of the certification exam, and this new, revised edition closely matches the new test plan. Each topic includes learning objectives, outline discussion, study questions, answers with rationales and references. A new sample exam is located in the back of the book.

This AJN Book of the Year provides current treatment approaches to nursing care in a variety of health care settings the home, hospitals, clinics, and nursing homes. Research-based and fully revised, it discusses the problems and syndromes seen in the older population and covers topics in depth, providing a synthesis of difficult-to-find material. Discussions of assessment instruments, guidelines, protocols, and resources are provided to assist nurses in the management of these clinical problems. This edition also features 12 new chapters that focus on topics such as legal aspects, pain and discomfort, cardiovascular problems, sensory disorders, and intimacy and sexuality. Provides information applicable to all clinical settings -- eg., home care, hospitals, clinics and nursing homes. Features a research-based approach to care and current treatment approaches. Contains in-depth coverage of topics not often found in other nursing texts, such as prescription and OTC drug use and misuse, failure to thrive, iatrogenesis, pain, arthritis and Parkinson's Disease. Reviews the instruments, guidelines, protocols, and resources used in the management of clinical problems. Organizes content by clinical problems and syndromes as opposed to diseases and systems. Summarizes key aspects of clinical problems within tables. Contributions from 25 new contributors. New chapters that cover topics such as advanced practice of gerontological nursing, models of practice, legal aspects, failure to thrive, arthritis, cardiovascular problems, sensory disorders, intimacy and sexuality, pain and discomfort and mistreatment of the elderly. 25 new contributors 12 new chapters that cover topics such as advanced practice of gerontological nursing; models of practice; legal aspects; failure to thrive; arthritis; cardiovascular problems; sensory disorders; intimacy and sexuality; pain and discomfort, and mistreatment of the elderly.

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars "Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." "The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." "Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises

Learn a positive, uniquely Canadian approach to older adult care. Canada's rapidly aging population will place an unprecedented burden on the health care system and on tomorrow's nurses. It is critical that health care professionals be properly equipped to address the needs and comfort of your older adult patients and clients. Ebersole and Hess' Gerontological Nursing and Healthy Aging, First Canadian Edition includes statistics, legislation, practice guidelines, standards of care, and examples relevant to Canadian practice. Chronic disorders are presented in the framework of health promotion and illness prevention. Canadian demographics and statistics Canadian practice guidelines Canadian law Roles of Canadian health care providers CNA code of ethics Canadian drug names Canadian lab values Canadian research findings Canadian assessment tools Canadian screening guidelines

The Second Edition of this A-to-Z guide covers a wide range of areas of concern pertaining to the growing geriatric population. Completely reviewed, updated and expanded, it includes more than 150 illustrations and charts. This text invites readers to investigate more than 200 disorders and age-oriented issues, such as lab value changes, sexuality, grief and loss, alternative therapies and cultural influences on compliance, self-care and recovery. Comprehensive and easy-to-use, this manual covers Alzheimer's, cataract removal treatments, and many other new and expanded topics.
