The second edition of the Handbook of Test Development provides graduate students and professionals with an up-to-date, research-oriented guide to the latest developments in the field.

Including thirty-two chapters by well-known scholars and practitioners, it is divided into five sections, covering the foundations of test development, content definition, item development, test design and form assembly, and the processes of test administration, documentation, and evaluation. Keenly aware of developments in the field since the publication of the first edition, including changes in technology, the evolution of psychometric theory, and the increased demands for effective tests via educational policy, the editors of this edition include new chapters on

Assessing noncognitive skills, measuring growth and learning progressions, automated item generation and test assembly, and computerized scoring of constructed responses. The volume also includes expanded coverage of performance testing, validity, fairness, and numerous other topics. Edited by Suzanne Lane, Mark R. Raymond, and Thomas M. Haladyna, *The Handbook of Test Development*, 2nd edition, is based on the revised *Standards for Educational and Psychological Testing*, and is appropriate for graduate courses and seminars that deal with test development and usage, professional testing services and credentialing agencies, state and local boards of education, and academic libraries serving these groups.

At the dawn of the last century, leading scientists and politicians giddily predicted that science—especially Darwinian biology—would supply solutions to all the intractable problems of American society, from crime to poverty to sexual maladjustment. Instead, politics and culture were dehumanized as scientific experts began treating human beings as little more than animals or machines. In criminal justice, these experts denied the existence of free will and proposed replacing punishment with invasive “cures” such as the lobotomy. In welfare, they proposed eliminating the poor by

sterilizing those deemed biologically unfit. In business, they urged the selection of workers based on racist theories of human evolution and the development of advertising methods to more effectively manipulate consumer behavior. In sex education, they advocated creating a new sexual morality based on “normal mammalian behavior” without regard to longstanding ethical and religious imperatives. Based on extensive research with primary sources and archival materials, John G. West’s captivating *Darwin Day in America* tells the story of how American public policy has been corrupted by scientific ideology. Marshaling fascinating anecdotes and damning quotations, West’s narrative explores the far-reaching consequences for society when scientists and politicians

deny the essential differences between human beings and the rest of nature. It also exposes the disastrous results that ensue when experts claiming to speak for science turn out to be wrong. West concludes with a powerful plea for the restoration of democratic accountability in an age of experts.

Chapter Discussion Question:
Teachers are encouraged to participate with the student as they complete the discussion questions. The purpose of the Chapter Purpose section is to introduce the chapter to the student. The Discussion Questions are meant to be thought-provoking. The student may not know the answers but should answer with their, thoughts, ideas, and knowledge of the subject using sound reasoning and

logic. They should study the answers and compare them with their own thoughts. We recommend the teacher discuss the questions, the student's answers, and the correct answers with the student. This section should not be used for grading purposes. DVD: Each DVD is watched in its entirety to familiarize the student with each book in the course. They will watch it again as a summary as they complete each book. Students may also use the DVD for review, as needed, as they complete each chapter of the course. Chapter Worksheets: The worksheets are foundational to helping the student learn the material and come to a deeper understanding of the concepts presented. Often, the student will compare what we should find in the fossil record and in living creatures if evolution were true with what we

actually find. This comparison clearly shows evolution is an empty theory simply based on the evidence. God's Word can be trusted and displayed both in the fossil record and in living creatures. Tests and Exams: There is a test for each chapter, sectional exams, and a comprehensive final exam for each book.
