Loosening the truss rod increases the curvature of the neck, tightening it makes the neck straighter. When set correctly, the neck should have a very slight concave curve to it, which our repairer measures by resting a long, metal straight-edge along the fretboard. Check for high frets.

*Acoustic Guitar Set Up | A guide to the set up process*

Remove the capo from the 1st fret and whilst looking at the side of the fingerboard on the bass side, place your small ruler behind the 6th string directly on the 12th fret. Measure the distance from the top of the 12th fret to the bottom of the 6th string. This gap should be from .085" to .093" (5.5/64" to 6/64").

the playability of your guitar by yourself? Did you ever wonder what a tech does when you take your guitar in for a "set up"? Well now the answers to your questions and all the steps are laid out in my Guitar Set Up Guide. My guide contains all the information you need based on my 20+ years of experience as a guitar tech. It also answers many questions that you may have asked yourself about intonation, adjusting pickups, cleaning your frets and so forth. To help you better understand the set up process I have included many detailed photos as well as instructional videos showing you how the set up is done. I wrote this Guitar Set Up Guide for guitar players who want to set up and maintain their own guitars and for the player who just want to know this information so they can relate to their techs. All the content is geared for the very beginner to the advanced player. I receive dozens of emails per week asking a wide variety of guitar related questions and now the answers are incorporated in one comprehensive guide. Questions such as: "How far away should the pickups be from the strings"? "Which way do I turn the truss rod adjustment to straighten my guitar's neck"? "What is the easiest way to clean the frets on my guitar"? "I've tried to intonate my guitar but it still doesn't play in tune. Why is this"?
