with boundless imagination, is able to achieve this, using pencil and brush, acrylic paint and airbrush. The works collected here are simultaneously breathtaking and at times repulsive, yet all of them utterly fascinating. Very few of these images have been published before, but now the time has come for Sorayama to release this secret work. These images are really not for the squeamish; you have been warned! the publication of his first work, Pink Journal, he transferred to Tokyo's Chuo Art School where he began to study art. Sorayama graduated in 1968 at the age of 21, and gained an appointment in an advertising agency. He became a freelance illustrator in 1972. In 1978 he drew his first robot and that started his career as a unique artist lauded by his peers fans and collectors. In retrospect, Sorayama's work has been remarkably prescient. Beginning in the 1970's and evolving into the 21st century, the futuristic aura of the robotic, mythic and fantastical figures in his art have always been ahead of their time in many cases predictive of future reality. He resides in Tokyo.

Science Digest, Science News, Scientific America, and Discover may have all been selling well to armchair scientists, but Omni masterfully blended cutting edge science news and science fiction, flashy graphic design, a touch of sex, and the images of a generation of artists completely free and unburdened by the disciplines of the masters. Created by the legendary Bob Guccione, better known for founding Penthouse than perhaps any of the other facets of his inspired career in business, art, and literature, Guccione handpicked the artists and illustrators that contributed to the Omni legacy—they in turn created works ignited by passion
