How should we define happiness-and how happy are we supposed to be? Does each of us have a genetically determined "set point" of happiness? What dangers may lie in the new breed of drugs that allow us to fine-tune our moods so that we are happy most of the time? Fascinating research in a range of fields is providing provocative answers to these and many more questions about what makes us happy and how we can control our moods. We are in the midst of a revolution in the understanding of how our brains work; at the same time, we have entered a bold new age of pharmacology that is allowing drug-makers to craft molecules that are exquisitely tailored to produce desired mood-altering effects. In this lively and stimulating narrative, acclaimed science writer Stephen Braun takes readers to the frontlines of discovery in these areas and explores how this "brave new world" of mood manipulation will impact our lives. Based on extensive interviews with scientists at the forefront of research, as well as the compelling personal stories of many individuals, The Science of Happiness presents an accessible, engaging, and well-balanced account of what we need to know as we enter this new era. "Readers who want a quick overview of the latest neuroscientific research into how antidepressants and mood-elevating drugs work need look no further."-Publishers Weekly "Chiefly valuable in raising some important issues."-Kirkus Reviews "This brief, engaging, and personal view of mood and its influence on all aspects of our lives travels from drug company labs to Zen retreats in an effort to open up the black box containing temperament. [Braun's] writing is powerfully charming, even while delving into deep philosophical issues and little-understood scientific theories."-Amazon.com

Unlocking the Mysteries of Creation is a top-selling book in the homeschool market. This book is marketed in both homeschool and adult markets. The book has wide appeal in all the following areas: Youth, Adult, Creation/Science, Biblical Studies, and General Interest.

Positive psychology moves psychology from a medical model toward a strengths model to help clients shore up their strengths and thereby lead happier, more fulfilling lives. Positive Psychology Coaching: Putting the Science of Happiness to Work for Your Clients provides concrete language and interventions for integrating positive psychology techniques into any mental health practice.

Ideal for students and both beginning and practicing catalogers in public, school, and academic libraries, this updated workbook offers targeted, hands-on exercises that enhance understanding of description, classification, subject analysis, subject heading application, and MARC 21 subject analysis. • Provides more than 100 examples that together encompass virtually all types of materials libraries collect and catalog, with MARC "answer" records • Offers exercises that allow practice in AACR2r and RDA, description, subject classification, subject heading application, classification, subject analysis, and MARC 21 • Covers both RDA and AACR2r answer records for selected exercises • Includes non-English materials • Links to a website that provides for multiple approaches and answer records and enables you to view all the graphics in color and enlarge them as needed • Links instruction to an additional website that provides answer records for all exercises

We are obsessed with time. However hard we might try, it is almost impossible to spend even one day without the marker of a clock. But how much do we understand about time, and is it possible to retrain our brains and improve our relationship with it? Drawing on the latest research from the fields of psychology, neuroscience, and biology, and using original research on the way memory shapes our understanding of time, acclaimed writer and broadcaster Claudia Hammond delves into the mysteries of time perception. Along the way, she introduces us to an extraordinary array of colourful characters willing to go to great lengths in the interests of research, such as the French speleologist Michel, who spends two months in an ice cave in complete darkness. Time Warped shows us how to manage our time more efficiently, speed time up and slow it down at will, plan for the future with more accuracy, and, ultimately, use the warping of time to our own advantage.

Explores the success of "The Secret," including what it is, where it came from, and what makes the idea so appealing.

A new perspective on life satisfaction and well-being over the life course What makes people happy? The Origins of Happiness seeks to revolutionize how we think about human priorities and to promote public policy changes that are based on what really matters to people. Drawing on a range of evidence using large-scale data from various countries, the authors consider the key factors that affect human well-being, including income, education, employment, family conflict, health, childcare, and crime. The Origins of Happiness offers a groundbreaking new vision for how we might become more healthy, happy, and whole.
