As scholarly interest in baseball has increased in recent years, so too has the use of baseball both as subject and as teaching method in college courses. In addition to lecturing on baseball history, professors are more frequently using baseball as a pedagogical tool to teach other disciplines. Baseball's interdisciplinary appeal is evident in the myriad ways that diverse college faculty have made use of it in the classroom. In this collection of essays, professors from different disciplines explain how they have used baseball in higher education. Organized by academic field, essays offer insight into how baseball can help teach key issues in archival research, business, cultural studies, education, experiential learning, film, American history, labor relations, law, literature, Native American studies, philosophy, public speaking, race studies and social history.

Powerful Teacher Education describes the strategies, goals, content, and processes of seven highly successful and long-standing teacher education programs - Alverno College, Bank Street College, Trinity University, University of California, Berkeley, University of Southern Maine, University of Virginia, and Wheelock College. All these colleges and universities have succeeded in preparing teachers to teach diverse learners to achieve high levels of performance and understanding. In discussing the common features of these programs, Linda Darling-Hammond shows what outstanding teacher education models do and how they do it, and what their graduates accomplish as a result. Powerful Teacher Education also examines the policies, organizational features, resources, and relationships that have enabled these programs to succeed.

Child abduction is the most widespread form of child victimization studied. In 1992 alone, a total of 27,553 cases of missing children were reported in New York State through the Missing Children Register. The majority of missing children cases involved suspected runaways. Abduction cases accounted for one percent of the total report; those committed by family members comprised the most frequent form of abduction (as opposed to abduction by strangers). In addition, 88 percent of the children reported missing were age 13 or older, 60 percent were girls, and 58 percent were white. Child abduction is a serious socio-economic problem. Until now there has been no text that addresses the incidence, psychological dimensions, and explanatory models of child abductions. This book fills a need by focusing on variables that assist in confronting and preventing child abductions, including teacher training, public education and awareness, psychotherapeutic techniques for families and friends of abducted children as well as the children themselves.
