When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

This new collection investigates German literature in its international dimensions. While no single volume can deal comprehensively with such a vast topic, the nine contributors cover a wide historical range, with a variety of approaches and authors represented. Together, the essays begin to

adumbrate the systematic nature of the relations between German national literature and world literature as these have developed through institutions, cultural networks, and individual authors. In the last two decades, discussions of world literature-literature that resonates beyond its original linguistic and cultural contexts-have come increasingly to the forefront of theoretical investigations of literature. One reason for the explosion of world literature theory, pedagogy and methodology is the difficulty of accomplishing either world literature criticism, or world literary history. The capaciousness, as well as the polylingual and multicultural features of world literature present formidable obstacles to its study, and call for a collaborative approach that conjoins a variety of expertise. To that end, this collection contributes to the critical study of world literature in its textual, institutional, and translatorial reality, while at the same time highlighting a question that has hitherto received insufficient scholarly attention: what is the relation between national and world literatures, or, more specifically, in what senses do national literatures systematically participate in (or resist) world literature?
