The automotive lubricants arena has undergone significant changes since the first edition of this book was published in 1996. Environmental concerns, particularly regarding improvement of air quality have been important in recent years, Reduced emissions are directly related to changes in lubricant specifications and quality, and the second edition of the Automotive Lubricants Reference Book reflects the urgency of such matters by including updated and expanded detail. This second edition also considers the recent phenomenon of increased consolidation within the oil and petroleum additive arenas, which has resulted in fewer people for research, development, and implementation, along with fewer competing companies. After reviewing the first edition
