In this important, controversial, and at times troubling book, Sandra Whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the UN flag. Whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers. Examining evidence from Cambodia and Somalia, she argues that sexual and other crimes can be seen as expressions of a violent hypermasculinity that is congruent with militarized identities, but entirely incongruent with missions aimed at maintaining peace. She also asserts that recent efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of militaries, conflict, and women. This unsettling critique of UN operations, which also investigates the interplay between gender and racial stereotyping in peacekeeping, has the power to change conventional perceptions, with considerable policy implications.

Over the past years, knowledge-intensive industries have gained significant importance as economic factor, giving rise to professional service firms (PSFs) such as law firms, accounting firms, or consultancies. Following this development, the research interest especially in the strategies pursued by PSFs has grown substantially. However, past research focused mainly on strategies of established, mature PSFs, leaving academics as well as potential entrepreneurs without guidance on what newly founded, entrepreneurial PSFs should pay attention to in order to ensure lasting competitive advantages. Based on an explorative grounded theory analysis of two outstanding commercial law firm spin-offs in Germany, this work advances the research in this field. In addition to a detailed case study report, it offers a comprehensive theoretical framework and argues that PSFs have to employ a set of seven specific entrepreneurial strategies – including for example service delivery, people development, and client acquisition strategies – in order to successfully manage the entrepreneurial phase. In providing examples for the growing PSF industry, the findings on commercial law firm spin-offs also inform entrepreneurship research in other professions
