Do you want to understand Neural Networks and learn everything about them but it looks like it is an exclusive club? Are you fascinated by Artificial Intelligence but you think that it would be too difficult for you to learn? If you think that Neural Networks and Artificial Intelligence are the present and, even more, the future of technology, and you want to be part of it... well you are in the right place, and you are looking at the right book. If you are reading these lines you have probably already noticed this: Artificial Intelligence is all around you. Your smartphone that suggests you the next word you want to type, your Netflix account that recommends you the series you may like or Spotify's personalised playlists. This is how machines are learning from you in everyday life. And these examples are only the surface of this technological revolution. Either if you want to start your own AI enterprise, to empower your business or to work in the greatest and most innovative companies, Artificial Intelligence is the future, and Neural Networks programming is the skill you want to have. The good news is that there is no exclusive club, you can easily (if you commit, of course) learn how to program and use neural networks, and to do that Neural Networks for Beginners is the perfect way. In this book you will learn: The types and components of neural networks The smartest way to approach neural network programming Why Algorithms are your friends The "three Vs" of Big Data (plus two new Vs) How machine learning will help you making predictions The three most common problems with Neural Networks and how to overcome them Even if you don't know anything about programming, Neural Networks is the perfect place to start now. Still, if you already know about programming but not about how to do it in Artificial Intelligence, neural networks are the next thing you want to learn. And Neural Networks for Beginners is the best way to do it. Download Neural Network for Beginners now to get the best start for your journey to Artificial Intelligence. Paintings, magisterial and universal, that capture the essence of a vibrant African American community In his art Jonathan Green paints the world of his childhood and an ode to a people imbued with a profound respect for the dignity and value of others—the Gullah people of the South Carolina barrier islands. His canvases, beloved for their sense of jubilation and rediscovery, evoke the meaning of community in Gullah society and display a reverence for the rich visual, oral, and spiritual traditions of its culture. His art also reveals a keen awareness of the interpersonal, social, and natural environments in which we live. The 180 images assembled in this collection showcase the meaning, purpose, and beauty that Green finds in the small but critical tasks of life. His work elevates the everyday—preparing morning meals, doing the wash, accomplishing farming chores, finishing a day's work, relaxing in the evening—and celebrates the social and religious—community dances, baptisms, weddings, funerals. Green allows his audience the space and silence to observe people unobtrusively as they pursue life's mission of labor, love, and belonging and as they work in harmony with nature's mysterious, ever changing fabric. While Green's paintings speak specifically to his own upbringing, they transcend racial, cultural, and ethnic boundaries, thus allowing individuals of all backgrounds to recall fond memories and to reflect on the place that purpose and dignity hold in their lives. In addition to a foreword by Pat Conroy, essays by Bettye J. (Mbitha) Parker Smith, Lynn Robertson, and Ronne Hartfield complement Green's images. They tell of the vitality of the Gullah community, the progression of Green's career, and the authenticity of his work.
