What makes you passionate about working with SQL Server? What lessons have you learned, perhaps the hard way, on how to get the best performance and scalability out of your SQL Server databases? We challenged a group of talented, up-and-coming 'new voices' in SQL Server to share their passion and knowledge with the Community. A DBA's core responsibilities are constant. A DBA must maintain and enforce security mechanisms on the data, prepare effectively for disaster recovery, ensure the performance and availability of all the databases in their care. As such, we have chapters providing tips on how to get the most out of features such as data compression, backup verification, performance tuning with traces and extended events, auditing, SSIS, and more. Side by side with these, we have chapters on the importance to a DBA of communicating clearly with their co-workers and business leaders, presenting data as useful information that the business can use to make decisions, adopting a more Agile approach to their work, and sound project management skills. The resulting book, Tribal SQL, is a reflection of how a DBA's core and long-standing responsibilities sit alongside new thinking and fresh ideas about where the DBA role is going, and what it means to be a DBA in today's businesses.

The typewritten script of a First World War pilot's diary with a large number of photographs was submitted to the publishers William Heinemann and published by them in 1933. Heinemann stated on the book's jacket that the diary contained no names, dates, or anything that could reveal the identity of the writer or the squadron in which he served. The publishers understood that the diarist was killed in action in 1918 and that it was in deference to the wishes of those who were close to him that his diary should be published. So remarkable were the photographs that their veracity was immediately questioned, but no proof of their authenticity or otherwise could be ascertained. It was not until 1983 that a collection of documents, photographs and artifacts was presented to the Smithsonian's National Air and Space Museum. Some of the photographs were recognized as being those of the mystery diarist and the truth was soon revealed. The author was Wesley Archer, an American with Canadian parents who served with the RFC in the First World War, and the photographs and diary had been faked."
