I have just purchased a Hyundai ix35 CRDi 4x4 Premium which, according to the warranty booklet, must be serviced every 12 months or 12,500 miles. In your review of this car you said that the service interval was 12 months or 20,000 miles. This was also stated in several other trustworthy reviews that I read.

This book is for anyone interested in renewable energy for a sustainable future of mankind. Batteries, fuel cells, capacitors, electrolyzers and solar cells are explained at the molecular level and at the power plant level, in their historical development, in their economical and political impact, and social change. Cases from geophysics and astronomy show that electrochemistry is not confined to the small scale. Examples are shown and exercised.

This book combines (1) the most extensive treatment of the causes and phenomena of climate change in combination with (2) an extensive treatment of social obstacles and challenges (fossil-fuel funded denialism, media failure, political failure, and moral, religious, and economic challenges), (3) the most extensive treatment of the needed transition from fossil-fuel energy to clean energy, and (4) the most extensive treatment of mobilization. It provides the most complete, most up-to-date treatment of the various kinds of clean energy, and how they could combine to provide 70% clean energy by 2035 and 100% before 2050 (both U.S. and
