The book also discusses security department organization and staffing, management and supervision of the security force, training of security personnel, security force deployment and patrol activities, employee involvement and awareness of security issues, implementation of physical security safeguards, parking control and security, and emergency preparedness. This unique and innovative title offers a comprehensive exploration of the intersection of ethics, violence, trauma, and trauma surgery. Underscoring that the causes of violence include a wide range of socioeconomic factors, including poverty and the lack of economic opportunity, and that violence often occurs in impoverished and underserved communities, various authors from a wide range of disciplines outline how intentional violence toward another person is multidimensional and complex. Many of the authors use Chicago as a framework for their chapter discussion, but there are similarities in many urban settings throughout the United States and abroad. Part I of the book, *Ethical Issues Related to Violence*, includes seven chapters that examine ethical issues related to violence. Each of these chapters discusses a different but intersecting aspect of how violence challenges ethical standards in medicine and health. Part II, *Ethical Issues Related to Trauma and Trauma Surgery*, offers eight chapters that address various aspects of ethical issues related to trauma and trauma surgery. Part III, *Additional Concerns Relating to Violence and Trauma*, describe a series of issues relating to violence and trauma, including surgical procedures, psychological distress, and geographic disparities in access to trauma care. Developed by
