This is the latest edition of Elizabeth Moys' classic reference work for law librarians. This edition will bridge a 10-year gap since the 4th edition. Substantial revisions will be made including extended coverage to feature new areas, resulting in a more comprehensive and reliable book for law librarians which will help them to classify their law publications effectively. This edition has been revised and expanded by Diana Morris in conjunction with a team of contributing editors, who use the scheme daily. This publication is essential for law librarians or information workers with an interest in law librarianship, especially those who already use the Moys Classification Scheme in academic, corporate and other law libraries.

A comprehensive overview of the latest developments in world trade, covering the details of merchandise trade by product and trade in commercial services

The "Panorama of Transport" presents a statistical analysis of transport in the European Union, which was recently enlarged to include Bulgaria and Romania, as well as in the EFTA and candidate countries. Some comparisons with the US and Japan have been made when possible. Alongside traffic details (vehicle movements) and transport as such (movements of people and goods), the analysis also considers infrastructure, resources, transport as a separate sector of the economy, safety, and the impact on energy consumption and the environment.

"The fourth edition of Elements of Chemical Reaction Engineering is a completely revised version of the book. It combines authoritative coverage of the principles of chemical reaction engineering with an unsurpassed focus on critical thinking and creative problem solving, employing open-ended questions and stressing the Socratic method. Clear and organized, it integrates text, visuals, and computer simulations to help readers solve even the most challenging problems through reasoning, rather than by memorizing equations."--BOOK JACKET.
