This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict. At the most fundamental level, the objective of financial accounting is to provide owners and funders with comparable information on a company's value creation. The aim of management control, on the other hand, is to give the board, senior executives and employees unique information for strategy formulation and implementation. One often-mentioned negative effect is the risk of financial accounting affecting management control design and use, making it less relevant for decision-making at the company level. The book provides an analysis of the complex relationship between financial accounting and management control. The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system. An interesting, and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control. These complex relationships, which can influence the design and use of both financial accounting and management control, are discussed in detail in this book.

International Financial Reporting Standards (IFRS) are internationally-recognized financial reporting guidelines regulated by the International Accounting Standards Board (IASB) to ensure that uniformity exists in the global financial system. In addition to regulating financial reporting, the adoption of IRFS has been shown to impact the flow of foreign capital and trade. Economics and Political Implications of International Financial Reporting Standards focuses on the consequences and determinants of the adoption of the International Financial Reporting Standard (IFRS), which has remained a top issue in International Accounting. This timely publication brings to the forefront issues related to the political and economic influences and impacts of IFRS in addition to providing a platform for further research in this area. Policy makers, academics, researchers, graduate-level students, and professionals across the fields of management, economics, finance, international relations, and political science will find this publication pertinent to furthering their understanding of financial reporting at the global level.
