extra fractions you have in an answer if you end up with a complex fractional answer. HW 3, 4, 5, ... You can use frac(a,b), but don't have to. I don't use it except on very rare occasions, even if iLrn asks me to use frac(a,b). The fraction 'x+1 over x-2' would be frac(x+1,x-2) or abstractly frac(Numerator polynomial, Denominator polynomial).

Set around 12 German-speaking people and the worlds they live in, WELTEN focuses on the development of communicative competence and literacy through texts in various modalities. WELTEN helps students to acquire and practice functional language abilities while at the same time developing interpretive and analytical competencies and an appreciation of the aesthetic qualities of language. Through current, relevant, and meaningful materials, students learn to use language while seeing the world through the eyes of others, ultimately learning about themselves and the world they live in. With its innovative and integral video program, its contextualized and learner-centered presentation of grammar, and its unique selection of engaging texts from a broad range of genres, WELTEN brings a new approach to introductory German. Immersing students in the world of French language and culture, MOTIFS: AN INTRODUCTION TO FRENCH, Enhanced Sixth Edition, continues to set the standard for first-year French courses. Students learn through lively, culturally authentic contexts that enable them to communicate on larger, real-life themes, such as housing, school, food, work, and relationships. Offering a systematic study of French, the MOTIFS program provides the structures, vocabulary, communication strategies, and cultural background that enable students to think critically about different points of view, to share about themselves, and to learn about others. The sixth edition maintains its most popular readings while updating others and adding new readings to foster cross-cultural comparisons.
