Life Span Motor Development, Seventh Edition With HKPropel Access, is a leading text for helping students examine and understand how interactions of the developing and maturing individual, the environment, and the task being performed bring about changes in a person's movements. This model of constraints approach, combined with an unprecedented collection of video clips marking motor development milestones, facilitates an unmatched learning experience for the study of motor development across the life span. The seventh edition expands the tradition of making the student's experience with motor development an interactive one. Related online learning tools delivered through HKPropel include more than 190 video clips marking motor development milestones to sharpen observation techniques, with interactive questions and 47 lab activities to facilitate critical thinking and hands-on application.
