For School Grades 3 - 5 The American Industrial Revolution For School Grades 3 - 5 Keith Goodman The American Industrial Revolution is aimed at children in grades 3- 5, and examines the period, 1760 to 1914. This is a work/reference book that covers the technological advances that utilized water power, steam power, and electricity, and changed the world forever. There is a quiz after each section, which helps the reader monitor how much has been understood.

Holt Economics examines the way in which economics affects the lives of individuals and how individuals, through their economic choices, shape their world. Throughout Holt Economics, you are asked to think critically about the events and processes that shape your global, national, and local economy. - Publisher.

This is a unique account of working-class childhood during the British industrial revolution, first published in 2010. Using more than 600 autobiographies written by working men of the eighteenth and nineteenth centuries Jane Humphries illuminates working-class childhood in contexts untouched by conventional sources and facilitates estimates of age at starting work, social mobility, the extent of apprenticeship and the duration of schooling. The classic era of industrialisation, 1790–1850, apparently saw an upsurge in child labour. While the memoirs implicate mechanisation and the division of labour in this increase, they also show that fatherlessness and large subsets, common in these turbulent, high-mortality and high-fertility times, often cast children as partners and supports for mothers struggling to hold families together. The book offers unprecedented insights into child labour, family life, careers and schooling. Its images of suffering, stoicism and occasional childish pleasures put the humanity back into economic history and the trauma back into the industrial revolution.
