"Introduction to Media Production provides aspiring media producers with a comprehensive guide to production, helping you to understand the entire process of media creativity, beginning with the conception of an idea and audience considerations, through the preproduction, production, and postproduction processes, and finally to distribution and exhibition."

Offering both hands-on instruction and theoretical information, readers learn about various forms of media, how to choose and make the best use of them, and the techniques used to create a media project. With an emphasis on the creative, aesthetic, and technical aspects of creating media, this new edition sheds light on why the reasonings behind production choices are as important as knowing how to push the right buttons and turn the correct knobs.

Making Media: Foundations of Sound and Image Production takes the media production process and deconstructs it into its most basic components. Students will learn the basic concepts of media production - frame, sound, light, time, motion, and sequencing - and be able to apply them to any medium they choose, from film and television to fine art and online applications. They will also become well-grounded in the digital work environment and the tools required to produce media in today's digital environment. This new fourth edition is completely updated and includes a new chapter on the production process and production safety; information on current trends in production, exhibition, and distribution; and much more. New topics include virtual and augmented reality, the use of drones and new practices interactive media. The text is also fully illustrated and includes sidebar discussions of pertinent issues throughout. The companion website has been completely revamped with interactive exercises for each chapter, allowing students to explore the process of media production.

Learn everything you need to know about creating video using the single-camera format, from preproduction planning to setting up, rehearsing, shooting, striking, and pleasing your audience. Harness lighting, audio, editing, and aesthetic techniques that will enhance the quality of your video projects and keep your clients coming back for more. Simple, elegant, and easy to use, Single-Camera Video Production, Sixth Edition is a staple in any video artist's library. Whether you're just learning the basics of video production or you're a veteran who needs a refresher, this book provides you with a toolkit for understanding and implementing single-camera workflows, as well as how to use the single-camera format to its best advantage by emphasizing the importance of goals, audience analysis, and technology. This new edition has been updated to include: Expanded sections on digital workflows, field and studio production, preproduction planning, audio, lighting, distribution, and nonlinear editing techniques Detailed gear lists covering the latest camera, recorder, audio, lighting, and stabilization equipment used in the industry today Fresh tips on creating video for your target audience and exhibition platform and shooting for the editing process Insider career advice, including tips on how to get an internship, interviewing, finding a job, and earning a promotion A companion website (www.focalpress.com/cw/musburger) with video examples of the techniques discussed in the book as well as evolving updates on key technological shifts

A practical framework is provided in this textbook about the techniques, operations and philosophies of media production from the standpoint of both analog and digital technologies.

Introduction to Media Production, Third Edition, provides students with a practical framework for all aspects of media production by addressing the technological and aesthetic changes that have shaped the industry. Offering both hands-on instruction and theoretical information, it provides a sound basis for the techniques, operations, and philosophies of media production in the new digital environment. The new edition has been updated throughout with detailed information on how digital processes have changed everything from shooting to editing to finishing. It includes content on the Internet, writing for the Internet, Graphics and Animation.

This book contains revised selected papers from the Second International Conference on Information Technologies for Performing Arts, Media Access and Entertainment, ECLAP 2013, held in Porto, Portugal, in April 2013. The 24 papers presented were carefully reviewed and selected for inclusion in this book. They are organized in topical sections named: perspectives and (digital) strategies for cultural heritage institutions; trust, quality and tools for cultural heritage digital libraries; educational services for the performing arts; dance in the world of data and objects; acting and natural interaction; and music and opera of a digital generation.

"Wonderfully practical...just what every media writer needs." Christopher H. Sterling George Washington University * Learn what it takes to write for commercials, news, documentaries, corporate, educational, animation, games, the internet, and dramatic film & video productions * Outlines the key skills needed for a successful media writing career The demand for quality and knowledgeable multi-platform writing is always in high demand. An Introduction to Writing for Electronic Media presents a survey of the many types of electronic media you can write for, and explains how to do it. Musburger focuses on the skills you need to write for animation versus radio or television news versus corporate training. Sample scripts help you learn by example while modeling your own scripts. Production files illustrate the integral role writers' play in the production process, and individual movie frames allow you compare these to the real scripts. Armed with the skills developed in this book, a media writer can apply for a variety of positions in newsrooms, advertising firms, motion pictures or animation studios, as well as local and national cable operations. Robert B. Musburger, Ph.D., is Professor Emeritus and former Director of the School of Communication, University of Houston, USA. He has worked for 20 years in professional broadcasting, serving as camera operator, director, producer, and writer. Musburger has received numerous awards for his video work and teaching and he continues to work in electronic media with his Seattle, WA, consulting firm, Musburger Media Services. "[An] authoritative and clearly written description of the processes involved in writing for film, radio and television production." Raymond Fielding, Dean Emeritus Florida State University

Written in a clear, non-technical manner, Introduction to Video Production focuses on the fundamental principles of video production and the technologies used in production. This book discusses video aesthetics, technologies, and production practice in a clear and concise manner. It also emphasizes the importance of teamwork and planning in the production process. Chapters are clearly organized and heavily illustrated, with key terms identified in boldface. With Introduction to Video Production, readers will learn not only how the technology works, but how to work with the technology and with each other.

For nearly two decades, Television: Critical Methods and Applications has served as the foremost guide to television studies. Designed for the television studies course in communication and media studies curricula, Television explains in depth how television programs and commercials are made and how they function as producers of meaning. Author Jeremy G. Butler shows the ways in which camera style, lighting, set design, editing, and sound combine to produce meanings that viewers take away from their television experience. He supplies students with a whole toolbox of implements to disassemble television and read between the lines, teaching them to incorporate critical thinking into their own television viewing. The fourth edition builds upon the pedagogy of previous editions to best accommodate current modes of understanding and teaching television. Highlights of the fourth edition include: New chapter and part organization to reflect the current approach to teaching television--with greatly expanded methods and theories chapters. An entirely new chapter on modes of production and their impact on what you see on the screen. Discussions integrated throughout on the latest developments in television's on-going convergence with other media, such as material on transmedia storytelling and YouTube's impact on video distribution. Over three hundred printed illustrations, including new and better quality frame grabs of recent television shows and commercials. A companion website featuring color frame grabs, a glossary, flash cards, and editing and sound exercises for students, as well as PowerPoint presentations, sample syllabi and other materials for instructors. Links to online videos that support examples in the text are also provided. With its distinctive approach to examining television, Television is appropriate for courses in television studies, media criticism, and general critical studies.

The Media Book provides today's students with a comprehensive foundation for the study of the modern media. It has been systematically compiled to map the field in a way which corresponds to the curricular organization of the field around the globe, providing a complete resource for students in their third year to graduate level courses in the U.S.
