In the end, there's only one reason to invest: to build wealth. You can cut it any way you like. You can say that you want to invest to support socially-responsible companies, or to fund your children's education, or just to be able to retire and not worry about money. But the root of the idea, the realgoal of investing, is to build wealth.

As you have probably noticed, there are quite a few investing books out there. Many of them were written by some of the world's greatest investors. So, why should you read our book? Stock investing is more prevalent than ever, whether directly or indirectly through brokerage accounts, exchange-traded funds, mutual funds, or retirement plans. Despite this, the vast majority of individual investors have no training on how to pick stocks. And, until now, there hasn't been a truly accessible, easy-to-understand resource available to help them. The Little Book of Investing Like the Pros was written to fill this void. We believe the simplicity and accessibility of our stock picking framework is truly unique. Using real-world examples and actual Wall Street models used by the pros, we teach you how to pick stocks in a highly accessible, step-by-step manner. Our goal is straightforward—to impart the skills necessary for finding high-quality stocks while protecting your portfolio with risk management best practices. Our practical approach is designed to help demystify the investing process, which can be intimidating. This training will help set you apart from others who are largely flying blind. Pilots require extensive training before receiving a license. Doctors must graduate medical school, followed by a multi-year residency. Even those providing professional investment advice require certification. But, anyone can buy a stock without any training whatsoever. While buying stocks on a hunch and a prayer may not endanger your life, it can certainly put your finances at risk.

You Can Invest Like A Stock Market Pro is a how-to guide to help investors obtain market-beating returns from investing in stocks in the same manner that the stock market pros do to amass their fortunes. Because of the Great Recession that struck in 2007, many Americans have become leery about investing in the stock market. Investing in the stock market is still one of the most effective ways for most people to get rich and best of all, a high IQ isn't needed to do so. Investors simply need to know how to invest the right way since most people invest the wrong way. You Can Invest Like A Stock Market Pro teaches investors how to invest the right way.
