The overall penetration of both conventional and Islamic banking in 2020 has seen a small reduction, falling from 65% to 64% for conventional and from 60% to 58% for Islamic banking products as compared to 2019. However, Islamic banking has grown in popularity in the UAE since

As an ever-growing international business, Islamic banking has changed the face of economics in recent years. As more and more industries embrace Islamic principles, the industry will unquestionably influence modern economic practices and techniques across the globe. Growth and Emerging Prospects of International Islamic Banking is a collection of innovative research on the methods and applications of Islamic banking interests on a global economic scale. While highlighting topics including asset diversification, profit sharing, and financial reporting, this book is ideally designed for bankers, banking analysts, international business managers, financiers, industry professionals, economists, government officials, academicians, students, and researchers seeking current research on Islamic banking perspectives and approaches to finances.

From today's perspective, Islam and capitalism seem to be natural partners. In a world where state socialism is on the wane, Islamic states in particular seem to be run by an exploitative class that in their hyper-capitalist way of profit-making does not care at all about social justice. Modern history, however, has seen a great number of movements, political parties and individuals propagating the incompatibility of capitalism with Islam. And at a second glance, the quest for social justice and the rejection of capitalism actually appear as a driving force in different Islamic discourses, including that of the so-called Islamic State. The articles of this volume offer intriguing and original thoughts about the appropriate economic system for a Muslim society. Some of the concepts are based right away on socialism, while others call for a genuine, non-Western Islamic 'third way' between communism and capitalism. In fact, political reality has forced the secular Left to grapple with the response of Islamic movements to poverty and injustice. The volume therefore also includes useful insights into the Left's reaction to this political challenge. The articles cover a wide range of world regions, not only the Middle East and Turkey, but also the Far East and North Africa, with a time span ranging from the late 19th century to the present. In addition, the reader is also introduced to economic concepts of early Islam and their textual sources.

As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The Handbook of Research on Theory and Practice of Global Islamic Finance provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management, economic justice, and stock market analysis. It is designed for financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

Each issue of the Monthly Bulletin of Statistics (MBS) presents current economic and social statistics for more than 200 countries and territories of the world. Written in French and English, it contains over 50 tables of monthly and/or annual and quarterly data on a variety of subjects illustrating important economic trends and developments, including population, prices, employment and earnings, energy, manufacturing, transport, construction, international merchandise trade and finance. The annual subscription rate for the Monthly Bulletin of Statistics in print includes access to the MBS Online.

This paper analyzes the implications of Islamic precepts on banks' structure and activities, focusing on banking supervision issues. It points out and discusses these issues in the context of a paradigm version of Islamic banking, as well as in frameworks that fall between the paradigm version and conventional banking. The case of Islamic banks operating in a conventional system is also examined.

Featuring high-level analysis of Islamic law, this book examines fintech in Islamic finance from both theoretical and empirical perspectives. Whilst building on existing approaches, it also discusses the current application of fintech in promoting financial inclusion through innovative solutions in Muslim-majority countries, identifying future directions for policy-makers. With original chapters written by prominent academics, senior lawyers and practitioners in the global Islamic finance industry, this book serves as the first standalone pioneering reference work on fintech in Islamic finance. It also, for the first time, examines the position of Islamic law on cryptocurrencies, such as bitcoin. Besides the conceptual analysis of the Sharʿah and legal aspects of fintech in Islamic finance, this book provides relevant case studies showing current and potential developments in the application of fintech in various sectors ranging from crowdfunding and smart contracts, to Online Dispute Resolution, Investment Account Platform and identity verification in the KYC process. Setting the agenda for researchers in the field, Fintech in Islamic Finance will be useful to students and scholars of Islamic finance and financial technology.

Minority Religions under Irish Law focuses the spotlight specifically on the legal protections afforded in Ireland to minority religions, generally, and to the Muslim community, in particular.

This book covers the recent literature concerning Islamic banking and finance (IBF), focuses on the history of IBF since its inception and introduces the latest innovative concepts and practices in the field. The authors cover important topics such as the role of ownership, Shariʿah compliance and governance structures in raising debt capital using IBF practices, including Fatwa issues and the use of benchmarking practices. The book also addresses topics like archival data, the influence of leverage on ownership structure, and sukuk structures, as well as misconceptions, threats, challenges and opportunities in IBF. Finally, the book deals with prominent issues such as business score-carding, Takʿful (Islamic Insurance), IBF implications for block-chain-based fintech and finance hub concepts in Islamic microfinance models. This edited volume is an important contribution to the IBF literature as it provides a much-needed in-depth look into industry practices through the perspective of corporate finance and governance. With its interdisciplinary approach covering legal and financial issues along with a wide variety of notable contributors, this book will be a valuable reference guide to both teachers and students of Islamic banking and economics.

Income inequality has increased considerably in the aftermath of the financial crisis of 2007*08 to the extent that one percent of global population possess almost half of the global assets. Whereas the development community is unanimous to tackle growing inequality and imbalance in the distribution of wealth, there is a difference of opinion as to the approaches to achieve this goal. This report presents a perspective from Islamic finance on how shared prosperity can be enhanced. The theoretical framework for economic development by Islamic economics and finance is based on four fundamental pillars: (i) an institutional framework and public policy oriented to the development objectives of Islam; (ii) prudent governance and accountable leadership; (iii) promotion of the economic and financial system based on risk sharing; and (iv) financial and social inclusion for all, promoting development, growth, and shared prosperity. There is evidence that Islamic finance is experiencing high growth with the banking sector leading the way. Several countries are working seriously towards developing standards, regulation and legal frameworks for the development of Islamic finance. However, there are a number of aspects where policy interventions or improvements in policy effectiveness are needed to develop Islamic finance to promote shared prosperity. Without the enabling environment, Islamic finance may not be able to attain the potential expected of it. With adequate policy interventions and enabling financial infrastructure, Islamic finance could become a catalyst for alleviating poverty and inclusive prosperity.

Highlighting the impact of current globalization on financial markets, this topical book challenges the universality of Western property rights and interprets Islamic finance in Europe as part of a plural financial system, where different conceptions of economic justice(s) co-exist and influence each other. The contributing authors analyse key economic development and social integration issues from an Islamic perspective and outline the European approach to accommodating Islamic finance, with particular regard to the peculiarities of individual nation-states. Set in this context, the book presents financial pluralism as a device to enhance a level playing field in the global marketplace, as well as to foster a plural open society. Providing a comprehensive and methodological guide to Islamic finance in Europe, this book will prove an illuminating and informative read for academics, students and policymakers with an interest in the impact on financial regulation of an increasingly globalized world.
