KX125 (1982-1991), KX250 (1982-1991), KX500 (1983-2004)

Reeds Astro Navigation Tables is the established book of annual astro-navigation tables compiled specifically for the needs of yachtsmen. It contains all the information the ocean-going sailor needs (without the bulk) in order to navigate by the sun, moon, stars and planets, using tables devised by practical ocean navigators. This book, together with a sextant, will enable sailors to navigate confidently and safely when out of the sight of land. The book continues to feature the well-received additions of the past few years, including forms to help determine True Altitude (for the sun, stars and planets), Calculated Altitude (using the versine formula) and Azimuth (using the ABC Tables), as well as a pro forma for calculating Intercept. With 8 extra pages and an improved layout, there is plenty of space for making notes and calculations.

A tractor repair manual written for the experienced mechanic by professionals in an easy-to-use format , including numerous photos, illustrations and exploded views.

As the European Union (EU) launches its common currency (the Euro), Central European (CE) nations are searching for best practices in public liability management in order to smooth their integration into the EU. This work addresses that concern, examining borrowing policies, institution building, portfolio optimization, and the implications of the Euro and EU accession for public debt management. To help the CE countries achieve their goals, the World Bank and the European Commission held a two-day seminar in Brussels in mid-December 1997. European Union Accession presents the papers delivered at that seminar which was attended by all ten EU applicant countries: Bulgaria, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, the Slovak Republic, and Slovenia. The workshop pursued the following goals: 1. to investigate the implications of the launch of the Euro and of the EU accession on fiscal prudence and on the borrowing strategies of CE countries; 2. to facilitate the dissemination of the best public liabilities management techniques developed worldwide; and 3. to explore plausible arrangements to promote prudent public liabilities management in Central Europe through a regional expertise network.

The pampered daughter of a wealthy Hasidic businessman, Batsheva Ha-Levi grows up in the affluent suburbs of Los Angeles. But everything changes when she turns eighteen and finds that her loving father has made a secret vow which will shatter her life, forcing her to marry a man she hardly knows and sending her to the exotic, golden city of Jerusalem. On her wedding day, she enters a strange and foreign world steeped in tradition and surrounded by myth. Shackled by ancient rules, she soon understands that to survive she will have no choice but to fight for her freedom, to reconcile her own need to live in the modern world with her ancestral obligations, and to choose between the three men who vie for her body, her soul, and her love. Now a classic listed among the one hundred most important Jewish books of all time*, *Jephte's Daughter* is bestselling author Naomi Ragen's beloved first novel. With poignancy and insight, it takes readers on a groundbreaking and unforgettable journey inside the hidden world of women in the ultra-Orthodox Jewish community. *100 Essential Books For Jewish Readers, Rabbi Daniel B. Sync and Lindy Frenkel Kanter

Evaluates five manual post drivers suited for driving metal T-posts that are 8 to 10 feet long. Standard drivers can't be used for such long posts unless the operator stands on a ladder or in the back of a truck, practices that aren't practical in remote areas and aren't safe on steep terrain. Drivers for longer posts have long handles that allow the driver to be used by an operator standing on the ground. The drivers tested included the Standard-Signs Models NO4 and NO8, the Post Mate, and two drivers developed by the Missoula Technology and Development Center, the PD-1 and PD-2. The tech tip includes information on commercially available models and on two models designed by the Missoula center.

A comprehensive manual covering everything you need to know about small engine repair and maintenance. Includes step-by-step instructions and hundreds of photos. All there is to know about Small Engine Repair for up to and including 5 HP engines: • Includes Briggs & Stratton, Honda, Sears Craftsman and Tecumseh • Maintenance • Repair • Troubleshooting Book Summary • Tools and equipment • Shop practices and safety • Troubleshooting • Tune-up and maintenance procedures • Carburetor adjustment and overhaul • Ignition system servicing • Recoil starter repairs • Repair and overhaul instructions • Comprehensive specs Table of Contents Introduction Chapter 1: Setting up shop Chapter 2: General shop practices Chapter 3: Troubleshooting Chapter 4: Tune-up and routine maintenance Chapter 5: Repair procedures common to all engines Chapter 6: Briggs & Stratton engines Chapter 7: Tecumseh/Craftsman engines Chapter 8: Honda engines

How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! How to Build a Cheap Chopper- Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

Death of Riley, the fascinating, well-researched, and suspenseful second novel in Rhys Bowen's Agatha Award-winning series. Molly Murphy has finally begun to forget the unpleasant murder of a would-be rapist back in Ireland, not to mention her investigation into the murder of a fellow recent Irish immigrant, and is finally free to begin her life in New York City. Given her experiences so far in the New World, Molly has decided that her first order of business is to become a private investigator, a people finder of sorts, working for families in Europe who've lost touch with relatives in America. Not only might this put some food on her table, but her second order of business is to hook the handsome NYPD police captain Daniel Sullivan, and she envisions lots of opportunities to "seek his counsel" in her new profession. Paddy Riley is a tough old Cockney p.i. who specializes in divorce work, and with a little persuasion he's ready to take on Molly as an apprentice. It's not exactly what she imagined, but she plans to make the most of it. That is, until she comes in to work one day to find her new world turned upside down and all expectations for her professional life suddenly up in the air. Before long, Molly has set off on a journey that will take her through the back alleys of Manhattan and into the bars and lounges of the literary scene, where she spends time with writers, actors, poets, and musicians. It's quite an eye-opening turn for innocent young Molly, but she's resolute in her decision to find out exactly what happened that day in the office of Paddy Riley. Armed with nothing more than her fiery will and matching wild red hair, Molly has no idea of the danger her pursuit may bring ...
