This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus- tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in- terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Fifth Edition of A History of the Roman People continues to provide a comprehensive analytical survey of Roman history from its prehistoric roots in Italy and the wider Mediterranean world to the dissolution of the Roman Empire in Late Antiquity in A.D. 600. Clearly organized and highly readable, the text's narrative of major political and military events provides a chronological and conceptual framework for the social, economic, and cultural developments of the periods covered. Major topics are treated separately so that students can easily grasp key concepts and ideas.

USA Today bestselling author:This Christmas in Big Rock, the bad guys have a lot more to worry about than coal in their stockings . . . At the Sugarloaf Ranch, Smoke and Sally Jensen prepare to welcome their friend Preacher home for the holidays-unaware that he's trailed by a storm full of trouble. On a mission of vengeance, an old trapper is rescued by Ace and Chance Jensen from ruthless outlaws-and wanted by a driven bounty hunter named Luke Jensen. And, just released from prison, a criminal mastermind assembles a vicious gang of cutthroats to exact his final revenge against his enemy-the sheriff of Big Rock, Colorado . . . With a snowstorm brewing, a community in jeopardy, and a showdown ready to explode, these courageous pioneers are brought together by fate and fury to forge peace on earth. But they're going to have to fight for it. With guns. With grit. With glory. Because this Christmas, the greatest gift of all is . . . staying alive. Raves for Butch Cassidy The Lost Years! "Johnstone is a masterful storyteller, creating a tale that is fanciful and funny, exciting and surprisingly convincing. This is great fun." -Publishers Weekly "An entertaining story with lots of plot twists." -Booklist Raves for Johnstone's Christmas epics! In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Packed with puzzles and activities: odd one out, counting and sorting, matching, word games, and jigsaws.
