This is a concise version of the eighth edition of Management which has been translated into 15 languages and has been well accepted around the world since it was first published over 30 years ago. This updated version deals with essential aspects of management. The author believes that the functions of managers are essentially the same whether they are supervisors, administrators, middle-rung or top executives. There may be variations in environment, scope of authority and types of problems, but the basic function remains the same: to obtain results by establishing an environment for effective and efficient performance of individuals operating in groups. ISBN 0-07-Y66498-6 (pbk.) :

A wide range of conceptualizations of "management" have been offered and it is often difficult for managers to fully understand their roles within the organization; however, managers striving for effectiveness would do well to invest effort into understanding the functions, roles, and skills associated with managerial positions. In order to be adroit practitioners of their craft, managers must understand these basic concepts, as well as the different levels of managerial effectiveness, how they are measured, the styles available to managers, and the factors that determine which style might be preferred in a particular instance. This book addresses a wide array of topics relating to the practice of management including the roles and activities expected from an effective manager, specific managerial skills, styles of management, management systems, and managing in developing countries.
