This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his Tractatus de sphaera during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

Petermanns Mitteilungen

First published in Germany in 1929, The End and the Beginning is a lively personal memoir of a vanished world and of a rebellious, high-spirited young woman's struggle to achieve independence. Born in 1883 into a distinguished and wealthy aristocratic family of the old Austro-Hungarian Empire, Hermynia Zur Muhlen spent much of her childhood travelling in

Europe and North Africa with her diplomat father. After five years on her German husband's estate in czarist Russia she broke with both her family and her husband and set out on a precarious career as a professional writer committed to socialism. Besides translating many leading contemporary authors, notably Upton Sinclair, into German, she herself published an impressive number of politically engaged novels, detective stories, short stories, and children's fairy tales. Because of her outspoken opposition to National Socialism, she had to flee her native Austria in 1938 and seek refuge in England, where she died, virtually penniless, in 1951. This revised and corrected translation of Zur Muhlen's memoir - with extensive notes and an essay on the author by Lionel Gossman - will appeal especially to readers interested in women's history, the Central European aristocratic world that came to an end with the First World War, and the culture and politics of the late nineteenth and early twentieth centuries.

This edition of Park and Burgess's introduction to sociology is unabridged and illustrated with the original tables, allowing the reader comprehension of the sociological principles explained by the authors. This textbook's mission is to detail every fundamental tenet of the sociology as a discipline. This is an all-encompassing guidebook which both introduces and demystifies the science of sociology for the curious reader or student. The entire first chapter is devoted to explaining the relationship of sociology with various other disciplines, and the theories of society which give rise to its most distinctive traits and approaches. This model of explanation is sustained throughout the entire text: each chapter focuses on a particular field of sociological interest, beginning with questions about humans and their nature. How people behave and interact with one another in everyday society, and whether such behaviors are altruistic or individualistic, law-abiding or otherwise, is discussed. Park and Burgess are informed by theories such as Darwin's theory of evolution, and utilise these to supplement their explanations. The notions of how humans work together, compete or act alone, and in groups of various sizes - be it on the scale of a partnership, a family, an ethnic or local grouping, or on a nationwide basis - is also covered. How people build their societies, and to what degree their endeavors result an accepting attitude and assimilation of outsiders is investigated. Later in the book, the notion of centralized control over the wider society comes to the fore. By what means such control is exerted, and the historical responses of various methods, are looked at in detail. Finally, there is an examination of how humans may behave collectively - as in a crowd or united in a purpose or ideal, and the various machinations through which human society progresses and prospers. In the manner of a good textbook, there are a selection of questions and problems situated at the conclusion of every chapter. These enable the reader to keenly review their own understanding of the explained principles. Furthermore, the unabridged chapters each have a bibliography appended so that the reader may, if desired, independently research the myriad sources drawn upon by Park and Burgess.

Originally published in 1895, this early work of psychology is both expensive and hard to find in its first edition. It contains Freud and Breuer's case studies of hysteria and their methods of psychoanalytic treatment. This is a fascinating work and is thoroughly recommended for anyone with an interest in the history of psychology. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.
