Laboratory Exercises in Microbiology / Edition 4 by Robert ...

Credits: 3 Catalog Description: Introduces basic chemistry, the structure, function, and biochemistry of cells, and the scientific method. Laboratory exercises develop skills including use of binocular microscopes and measuring. This is a preparatory course, for students with little or no recent experience in biology and chemistry, who plan on taking additional biology courses.

The Microbiology Laboratory Manual by Pollack presents exercises and experiments on microbiology laboratory. The labs are introduced in a clear and concise manner, while maintaining a reader-friendly tone. The manual contains a variety of interactive activities and experiments that teach the basic concepts of microbiology. It also covers methods that allow the safe movement or transfer of microbial cells from one type of growth environment, classification and identification of microbes, microbial biochemistry, medical, food and environmental microbiology.

Laboratory Exercises in Microbiology, tenth Edition was designed and written to be directly correlated to Prescott's Microbiology, tenth Edition, by Joanne M. Willey, Linda M. Sherwood, and Christopher J. Woolverton. The class-tested exercises are modular to allow instructors to easily incorporate them into their course. This balanced introduction to each area of microbiology now also has accompanying Connect content for additional homework and assessment opportunities.

Designed for major and non-major students taking an introductory level microbiology lab course. Whether your course caters to pre-health professional students, microbiology majors or pre-med students, everything they need for a thorough introduction to the subject of microbiology is right here.

The laboratory manual provides a balanced introduction to laboratory techniques and principles that are important in each area of microbiology.

The Laboratory Exercises in Microbiology, 5e by Pollack, et al. presents exercises and experiments covered in a 1 or 2-semester undergraduate microbiology laboratory course for allied health students. The labs are introduced in a clear and concise manner, while maintaining a student-friendly tone. The manual contains a variety of interactive activities and experiments that teach students the basic concepts of microbiology. The 5th edition contains new and updated labs that cover a wide array of topics, including identification of microbes, microbial biochemistry, medical microbiology, food microbiology, and environmental microbiology.

Exercises for the Microbiology Laboratory, Fourth Edition by Michael J. Leboffe and Burton E. Pierce is an inexpensive, black-and-white manual that provides a concise and flexible alternative to other large microbiology laboratory manuals. It can be used by itself as a required lab text, but is also designed to be used in conjunction with A Photographic Atlas for the Microbiology Laboratory.

Prescott, Harley and Klein's 6th edition provides a balanced, comprehensive introduction to all major areas of microbiology. Because of this balance, Microbiology, 6/e is appropriate for students preparing for careers in medicine, dentistry, nursing, and allied health, as well as research, teaching, and industry. Biology and chemistry are prerequisites.

Laboratory Exercises in Microbiology, Ninth Edition was designed and written to be directly correlated to Prescott's Microbiology, Ninth Edition, by Joanne M. Willey, Linda M. Sherwood, and Christopher J. Woolverton. The class-tested exercises are modular to allow instructors to easily incorporate them into their course. This balanced introduction to each area of microbiology now also has accompanying Connect content for additional homework and assessment opportunities.

Laboratory Applications in Microbiology: A Case Study Approach uses real-life case studies as the basis for exercises in the laboratory. This is the only microbiology lab manual focusing on this means of instruction, an approach particularly applicable to the microbiology laboratory. The author has carefully organized the exercises so that students develop a solid intellectual base beginning with a particular technique, moving through the case study, and finally applying new knowledge to unique situations beyond the case study.
