The 2008 Mitsubishi Lancer car makes a clicking noise but won't start:
If you turn the key to the "Start" position, but the engine won't crank; all you hear is a single click or repeated clicking coming from the engine compartment.
Very often this could be caused by a low battery or poor connection between the battery and starter.

The guide comes complete with recommendations of the best editions and translations for every genre from the most enticing crime and punishment to love, sex, heroes and anti-heroes, not to mention all the classics of comedy and satire, horror and mystery and many other literary genres.
With feature boxes on experimental novels, female novelists, short reviews of interesting film and TV adaptations, and information on how the novel began, this guide will point you to all the classic literature you'll ever need.

The government performance movement has been in full swing for decades around the world.
So, why do so many public programs and organizations continue to underperform?
A major reason is that measuring the types of performance that people value most – real outcomes for citizens -- continues to be an elusive goal.
And why is performance measurement so difficult?
Because performance managers have not taken full advantage of the tools and knowledge available in the field of program evaluation; the worlds of performance measurement and program evaluation have much to learn from each other, but they remain largely separate for reasons of history, politics, and inertia.
Improving Public Services spotlights recent advances in the theory and practice of performance measurement with potential to bridge the divide.
As the text's essays, case studies, and comparative analyses demonstrate, many of the challenges to outcome-based performance measurement are similar across national and cultural boundaries.
And many of these challenges are amenable to solutions drawn from program evaluation, especially program theory as captured in logic models.
Key issues addressed include designing and implementing high-performance contracts, using administrative data to measure performance and evaluate program effectiveness, minimizing the unintended consequences of performance-based incentive schemes, measuring qualities of governance as well as service delivery, and fitting performance systems to different institutional settings.
The authors offer insights relevant to charitable organizations, private service providers, international bodies, municipalities, states, and national governments in developed, developing, and transitional countries.
As the global debate over performance management rages on, this volume points to promising directions for future research and practice at the intersection of program evaluation and outcome-based public management.

In today's situation the security and safety of our countrymen is not only into the hands of Indian army and state police but also forces known as Paramilitary Forces.
The security of Indian borders and internal matters are being looked after by these brave men working in these Paramilitary Forces including their history, origin, organization, duties and functions, role and future.
It also examines the role of these forces in counter-insurgency and also international peacekeeping under UN.
Covering all paramilitary organizations of India, this volume provides valuable information to students, researchers and laymen.
An excellent book, which will serve as a sound and lively introduction for all, and also will, makes an impressive and substantial contribution to study of Paramilitary Forces of India.

Includes retail data on domestic and imported cars, trucks, and vans; acceptable mileage ranges; and costs of specific optional factory features.
