This publication is aimed at students and teachers involved in programmes that train medical physicists for work in diagnostic radiology. It provides, in the form of a syllabus, a comprehensive overview of the basic medical

Download Free Lecture

physics knowledge
required for the
practice of modern
diagnostic
radiology. This
makes it
particularly useful
for graduate
students and
residents in
medical physics
programmes. The
material presented
in the publication

Download Free Lecture

has been endorsed by the major international organisations and is the foundation for academic and clinical courses in both diagnostic radiology physics and in emerging areas such as imaging in radiotherapy.

Download Free Lecture

Presents more than 1,000 experiments selected from worldwide sources, from high school through graduate level.

Covering the theory of computation, information and communications, the physical

Tips and
techniques to build
interactive learning
into lecture classes

Have you ever
looked out across
your students only
to find them
staring at their
computers or
smartphones
rather than
listening
attentively to you?

Download Free Lecture

Have you ever wondered what you could do to encourage students to resist distractions and focus on the information you are presenting? Have you ever wished you could help students become active learners as they listen to you

Download Free Lecture

lecture? Interactive
Lecturing is
designed to help
faculty members
more effectively
lecture. This
practical resource
addresses such
pertinent questions
as, “How can
lecture
presentations be
more engaging?”
“How can we help

Download Free Lecture

“Do students learn actively during lecture instead of just sitting and passively listening the entire time?”

Renowned authors Elizabeth F. Barkley and Claire H. Major provide practical tips on creating and delivering engaging lectures as well as concrete

Download Free Lecture

techniques to help teachers ensure students are active and fully engaged participants in the learning process before, during, and after lecture presentations. Research shows that most college faculty still rely predominantly on traditional lectures

Download Free Lecture

as their preferred
teaching
technique.

However, research
also underscores
the fact that more
students fail
lecture-based
courses than
classes with active
learning
components.

Interactive
Lecturing combines

Download Free Lecture

Engaging
presentation tips
with active learning
techniques
specifically chosen
to help students
learn as they listen
to a lecture. It is a
proven teaching
and learning
strategy that can
be readily
incorporated into
every teacher's

Download Free Lecture

methods. In addition to providing a synthesis of relevant, contemporary research and theory on lecturing as it relates to teaching and learning, this book features 53 tips on how to deliver engaging

Download Free Lecture

presentations and
32 techniques you
can assign
students to do to
support their
learning during
your lecture. The
tips and techniques
can be used across
instructional
methods and
academic
disciplines both
onsite (including

Download Free Lecture

small lectures and large lecture halls) as well as in online courses. This book is a focused, up-to-date resource that draws on collective wisdom from scholarship and practice. It will become a well-used and welcome addition for everyone

Download Free Lecture

Dedicated to
effective teaching
in higher
education.
