The Dictionary of Jesus and the Gospels is unique among reference books on the Bible, the first volume of its kind since James Hastings published his Dictionary of Christ and the Gospels in 1909. In the more than eight decades since Hastings, our understanding of Jesus, the Evangelists and their world has grown remarkably. New interpretive methods illumined the text, the ever-changing profile of modern culture has put new questions to the Gospels, and our understanding of the Judaism of Jesus's day has advanced in ways that could not have been predicted in Hastings's day. But for many readers of the Gospels the new outlook on the Gospels remains hidden within technical journals and academic monographs. The Dictionary of Jesus and the Gospels bridges the gap between scholars and those pastors, teachers, students and lay people desiring in-depth treatment of select topics in an accessible and summary format. The topics range from cross-sectional themes (such as faith, law, Sabbath) to methods of interpretation (such as form criticism, redaction criticism, sociological approaches), from key events (such as the birth, temptation and death of Jesus) to each of the four Gospels as a whole. Some articles - such as the Dead Sea Scrolls, rabbinic traditions and revolutionary movements at the time of Jesus - provide significant background information to the Gospels. Others reflect recent and less familiar issues in Jesus and Gospel studies, such as divine man, ancient rhetoric and the chreiai. Contemporary concerns of general interest are discussed in articles covering such topics as healing, the demonic and the historical reliability of the Gospels. And for those entrusted with communicating the message of the Gospels, there is an extensive article on preaching from the Gospels. The Dictionary of Jesus and the Gospels presents the fruit of evangelical New Testament scholarship at the end of the twentieth century - committed to the authority of Scripture, utilising the best of critical methods, and maintaining dialog with contemporary scholarship and challenges facing the church.

Valued for its clear, accessible presentation of disciplinary writing, the first edition of An Insider's Guide to Academic Writing was celebrated by adopters at two-year and four-year schools alike. With this second edition, the authors build on that proven pedagogy, offering a series of flexible, transferable frameworks and unique Insider's video interviews with scholars and peers that helps students to adapt to the academic writing tasks of different disciplinary discourse communities - and helps instructors to teach them. New to the second edition is additional foundational support on the writing process, critical reading, and reflection, to give students stronger tools to apply to their disciplinary writing. An Insider's Guide to Academic Writing is based on the best practices of a first-year composition program that has trained hundreds of teachers who have instructed thousands of students. This volume addresses contemporary activist practices that aim to interrupt and reorient politics as well as culture. The specific tactics analyzed here are diverse, ranging from culture jamming, sousveillance, media hoaxing, adusting, subvertising, street art, to hacktivism, billboard liberation, and urban guerilla, to name but a few. Though indebted to the artistic and political movements of the past, this form of activism brings a novel dimension to public protest with its insistence on humor, playfulness, and confusion. This book attempts to grasp both the old and new aspects of contemporary activist practices, as well as their common characteristics and internal varieties. It attempts to open up space for the acknowledgement of the ways in which contemporary capitalism affects all our lives, and for the reflection on possible modes of struggling with it. It focuses on the possibilities that different activist tactics enable, the ways in which those may be innovative or destructive, as well as on their complications and dilemmas. The encounter between the insights of political, social and critical theory on the one hand and activist visions and struggles on the other is urgent and appealing. The essays collected here all explore such a confrontational collaboration, testing its limits and productiveness, in theory as well as in practice. In a mutually beneficial relationship, theoretical concepts are rethought through activist practices, while those activist practices are developed with the help of the insights of critical theory. This volume brings scholars and activists together in the hope of establishing a productive dialogue between the theorizations of our times and the subversive practices that deal with them.

**This collection of essays responds to the recent surge of interest in popular television in Eastern Europe. This is a region where television's transformation has been especially spectacular, shifting from a state-controlled broadcast system delivering national, regional, and heavily filtered Western programming to a deregulated, multi-platform, transnational system delivering predominantly American and Western European entertainment programming. Consequently, the nations of Eastern Europe provide opportunities to examine the complex interactions among economic and funding systems, regulatory policies, globalization, imperialism, popular culture, and cultural identity.This collection will be the first volume to gather the best writing, by scholars across and outside the region, on socialist and postsocialist entertainment television as a medium, technology, and institution"--

"This book examines the development of social movements in Iran and looks at the impact of environmentalism in particular. Based on in-depth original research, the case study of the "Environmental Movement" is integrated into a historical and comparative analysis which contributes to a better understanding of social movements of Iran. Implementing the new social movement theory of Touraine and Melucci in the Iranian context, the study offers a critical framework for studying social change and transformation of non-European countries"--

Monsters explores questions about the central concept of the monstrous: Why do we create monsters? Are they animal, human, both, or neither? Which of our fears and desires do monsters embody? What can monsters tell us about our cultural and historical moments? How do we cope with the monsters that haunt our imaginations--and our societies? Readings by classic poets, contemporary fiction writers, pop culture critics, philosophers, psychologists, occultists, veterinarians, ethicists, historians, and others take up these questions and more. Questions and assignments for each selection provide a range of activities for students to write about vampires, werewolves, zombies, mermaids, serial killers, classic horror movie monsters, and more strange things that go bump in the night. The Bedford Spotlight Reader Series is an exciting line of single-theme readers, each reflecting Bedford's trademark care and quality. An editorial board of a dozen compositionists at schools with courses focusing on specific themes assists in the development of the series. Each reader collects thoughtfully chosen selections sufficient for an entire writing course--about 35 pieces--to allow instructors to provide carefully developed, high-quality instruction at an affordable price. Bedford Spotlight Readers are designed to help students from all majors make sustained inquiries from multiple perspectives, opening up topics such as borders, food, gender, happiness, humor, language, music, science and technology, subcultures, and sustainability, to critical analysis. The readers are flexibly arranged in thematic chapters, with each chapter focusing in depth on a different facet of the central topic. Instructor support at macmillanlearning.com includes sample syllabi and additional teaching resources.

Monuments and memorials commemorating the dead and past events around the world have recently gained importance, not least because we are living in an era in which many are driven to record and archive the events of their lives. Cemeteries, in particular, are increasingly viewed as places associated with popular culture and cultural memory, with many now being considered as heritage tourism sites. Culture, Celebrity, and the Cemetery analyses the famous Hollywood Forever Cemetery in Los Angeles, USA, examining how the cemetery presents itself as an attraction, whilst also safeguarding and promoting cultural heritage. Focusing on an analysis of the articulation and performance of commemoration, Levitt examines how the cemetery leverages its rich resources to draw visitors and the diverse ways in which visitors interact with the cemetery, considering the influence of celebrity culture, fandoms, and cinema culture. Combining ethnographic research with cultural analysis, the book situates Hollywood Forever in the context of cemetery development in the United States and argues that touristic visits to cemeteries more generally have become similar to visits to more traditional memorials. Providing more than just a critical analysis of this fascinating cemetery as a landscape of famous death, Levitt coherently weaves the theme of cultural memory and meaning-making throughout every chapter. Offering the first book-length study of the cultural impact of Hollywood Forever in particular, and the cemetery as public heritage space in general, Culture, Celebrity, and the Cemetery will be of interest to scholars and students of heritage studies and tourism around the world.
