as a naturalist and broadcaster has spanned nearly six decades, and in this volume of memoirs Sir David tells stories of the people and animals he has met and the places he has visited. His first job - after Cambridge University and two years in the Royal Navy - was at a London publishing house. Then in 1952 he joined the BBC as a trainee producer, and it was while working on the Zoo Quest series (1954-64) that he had his first opportunity to undertake expeditions to remote parts of the globe, to capture intimate footage of rare wildlife in its natural habitat. He was Controller of BBC2

This book is not just about air travel. It is about the emergent social world of flying. It concerns air space and behavior in the air the way someone else might look at cities and street behavior. Economic, political, and cultural aspects are all considered. . . . Airports have now become specific places in

their own right that, in a certain sense, now. . . are very much like cities. Frequent flying also has produced its very own culture. Rules of behavior are subscribed to in the air. Unique behaviors at terminals and in the passenger cabin have emerged that contrast with life on the ground. In chapters below I explore these interesting aspects of etiquette, eroticism, and bi-coastalism, a human activity that is only possible because of our present society's evolution. . . . Only now have we begun to appreciate our emergent global culture. The world is shrinking just as the opportunities for

In this scientifically informed account of the changes occurring in the world over the last century, award-winning broadcaster and natural historian shares a lifetime of wisdom and a hopeful vision for the future. See the world. Then make it better. I am 93. I've had an extraordinary life. It's only now that I appreciate how extraordinary. As a young man, I felt I was out there in the wild, experiencing the untouched natural world - but it was an illusion. The tragedy of our time has been happening all around us, barely

noticeable from day to day -- the loss of our planet's wild places, its biodiversity. I have been witness to this decline. A Life on Our Planet is my witness statement, and my vision for the future. It is the story of how we came to make this, our greatest mistake -- and how, if we act now, we can yet put it right. We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited. All we need is the will do so.

Hockey's most famous voice, now in his own words. If you are a hockey fan, you know Bob Cole's legendary voice. He has done the play-by-play for some of hockey's best-remembered games, including the Summit Series, Canada's gold-medal game in Salt Lake City, and twenty years of Stanley Cup finals. The infectious excitement in his voice, his boyish love of the game, and his uncanny ability to anticipate the play have earned him the affection of generations of fans, induction into the Hall of Fame, and the unofficial title of best hockey broadcaster ever. Now,

for the first time, readers will see Cole at the centre of the story rather than watching it from the broadcast booth. We meet the young man growing up in Newfoundland in the years before it joins Canada. We see him talk his way into Foster Hewitt's office and into his first job. And of course we see some of the most cherished players in the game backstage: on the plane back from Russia in 1972, rubbing elbows with Bobby Orr; in the hallway on the old Montreal Forum, running into Jean Beliveau; meeting young players like Steve Stamkos, who grew up listening to him on Hockey Night in Canada. Written with

the expert help of massively bestselling author and respected broadcaster Stephen Brunt, these stories come to life with the charm and detail of a conversation with Cole. They sound like Cole. No one has been closer to the game over the years than Cole, and no one is more closely associated with all we love about the game than the man whose eyes we've seen it through. Now we will see so much more through those same eyes and in that unforgettable voice.

One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When Breath Becomes Air

chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as

Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. “I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything,” he wrote. “Seven words from Samuel Beckett began to repeat in my head: ‘I can’t go on. I’ll go on.’” When *Breath Becomes Air* is an unforgettable, life-affirming reflection on the challenge of facing death and on the
