Sponsored by the National Council of Teachers of Mathematics and written by leading experts in the field of mathematics education, the Handbook is specifically designed to make important, vital scholarship accessible to mathematics education professors, graduate students, educational researchers, staff development directors, curriculum supervisors, and teachers. The Handbook provides a framework for understanding the evolution of the mathematics education research field against the backdrop of well-established conceptual, historical, theoretical, and methodological perspectives. It is an indispensable working tool for everyone interested in pursuing research in mathematics education as the references for each of the Handbook's twenty-nine chapters are complete resources for both current and past work in that particular area.

What, if anything, is similar about citizen participation at the local level in Canada and China? The answer, of course, is politically sensitive. There are many in Canada who would claim that the question is absurd. How can there be meaningful citizen participation in a country where there are significant restrictions on political activity, including on the right to form organizations with political purposes? Presenting the work of leading scholars, *Citizen Participation at the Local Level in China and Canada* examines how citizens in each country participate at the local level. The book examines the development of citizen participation in local governance in Canada and China respectively. It then covers the characteristics of political culture and climate on local participation, highlighting factors especially unique to urban poor, class migration, and aboriginal and immigrant populations. The chapters also explore means of protest, demonstration, and articulation of preference by populations and issues where citizen participation has effected change such as land use, housing, urban development, and resource sustainability. The book includes case studies that compare Canadian and Chinese communities and extrapolate interesting policy-level changes at the local level based on citizen behavior and involvement. It underscores the similarities and differences in political participation in both countries and sets the stage for the steps in the citizen participation in both countries.

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team

for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

This edition of Science and Creationism summarizes key aspects of several of the most important lines of evidence supporting evolution. It describes some of the positions taken by advocates of creation science and presents an analysis of these claims. This document lays out for a broader audience the case against presenting religious concepts in science classes. The document covers the origin of the universe, Earth, and life; evidence supporting biological evolution; and human evolution. (Contains 31 references.) (CCM)
