This book integrates philosophy of biology and philosophy of medicine with the purpose of making philosophy practical for students and scientists. It contains many exercises and examples from live science. Much attention is given to the translation of scientific reasoning into the language of philosophy. The author shows that philosophical models can be used to evaluate science, if the limitations of the models are recognized so they can be applied in the proper context. On the other hand, some philosophical views of science need to be corrected by science. The book puts philosophy and science in a broader perspective. It integrates practical philosophy and ethics in applications to live science and uncovers limitations of current ethical theory.

This book is primarily prepared to cater students of undergraduate, postgraduate, research scholars and faculty members in Environmental Science, Environmental Engineering, Environmental Technology of universities/ institutes of India and abroad. It provides sufficient theoretical and practical knowledge about various environmental parameters, so as to have a clear understanding of them. The book comprises of four parts viz. air, water, soil and noise. Each part further contains various parameters involved in them except noise. Number of questions and answers on each parameter are presented in lucid and concise manner, so as to make all the aspects of it understandable. In addition to this, a number of appendixes are also appended which will provide additional knowledge on these parameters for overall understanding of them.

The present book “SET Life Science: Solved Papers” is specially developed for the aspirants of SET Life Sciences Examinations. This book includes previous solved papers SET Life Science papers of Maharashtra, Andhra Pradesh, Karnataka, Tamil Nadu, Kerala, Gujarat and Rajasthan. Main objective of this book is to develop confidence among the candidates appearing for SET examination in the field of Life Sciences. Both fundamental and practical aspects of the subject have been covered by solved questions. This book meets the challenging requirements of CSIR-NET, GATE, IARI, BARC and Ph.D entrance of various Indian universities.

The Routledge Companion to Humanism and Literature provides readers with a comprehensive reassessment of the value of humanism in an intellectual landscape. Offering contributions by leading international scholars, this volume seeks to define literature as a core expressive form and an essential constitutive element of newly reformulated understandings of humanism. While the value of humanism has recently been dominated by anti-humanist and post-humanist perspectives which focused on the flaws and exclusions of previous definitions of humanism, this volume examines the human problems, dilemmas, fears, and aspirations expressed in literature, as a fundamentally humanist art form and activity. Divided into three overarching categories, this companion will explore the histories, developments, debates, and contestations of humanism in literature, and deliver fresh definitions of “the new humanism” for the humanities. This focus aims to transcend the boundaries of a world in which human life is all too often defined in terms of restrictions—political, economic, theological, intellectual—and lived in terms of obedience, conformity, isolation, and fear. The Routledge Companion to Humanism and Literature will provide invaluable support to humanities students and scholars alike seeking to navigate the relevance and resilience of humanism across world cultures and literatures.
