This is a collection of writings about the spiritual meeting of East and West in the modern world including articles by the Dalai Lama, Huston Smith, Frithjof Schuon, Thomas Merton, Titus Burckhardt, Ananda Coomaraswamy, Diana Eck, Gary Snyder and Aldous Huxley. Highlighting aspects of Hinduism, Buddhism, and Taoism that have proved most attractive to Western seekers, it explores the similarities and differences between Eastern and Western traditions while emphasizing respect amongst the adherents of different faiths.

First published in 1963, this book by Bishop K. C. Pillai was written on the urging of many of his listeners to put his teachings into book form, "so that more Christians may be encouraged to trust in the Word of God, and believe more deeply through understanding." He explains in his Introduction that he was unable to put all of his teachings into one book at this time due to time constraints, but with this volume intends to "touch upon some of the portions of the Bible which my listeners tell me have been the most interesting and inspiring." A wonderful book for any reader who seeks to know and understand the Word of God...

Read Online Light From The East Eastern Wisdom For The Modern West

Since 1989, the postcommunist societies of Eastern Europe have been subject to policy advice and political and economic pressure which assumes that the development of 'free market' economies is the best route to economic growth and prosperity. The contributors to this volume take issue with this proposition. Though working from different theoretical perspectives, with different interests, they collectively argue that there are better ways to build dynamic and prosperous industrial economies in Eastern Europe than encouraging the respective societies of the region to ape the contents and swallow the myths of the Anglo-American form of capitalism. The contributors to this volume are among the leading authorities on economic transformation in Eastern Europe.

Master mythologist Joseph Campbell had a genius for finding the unifying symbols and metaphors in apparently distinct cultures and traditions. In *Myths of Light: Eastern Metaphors of the Eternal*, Campbell explores, with his characteristic clarity and humor, the principle that underlies all the great religions of India and East Asia, from Jainism and Hinduism to Buddhism and Taoism: the transcendent World Soul. Joseph Campbell began his comparative study of the world's religions with a chance meeting with the renowned Indian theosophist Jeddou Krishnamurti on a trans-Atlantic steamer. Though Campbell was deeply fascinated by mythologies and religions from every continent, Asia's potent mix of theologies captured his imagination more than any other, and offered him paths to understanding the essence of myth. In *Myths of Light*, Campbell explores the core philosophies and mythologies of the East, comparing them through vivid examples and stories to each other and to those of the West. A worthy companion to *Thou Art That* and to Campbell's *Asian Journals*, this volume conveys complex insights through warm, accessible storytelling, revealing the intricacies and secrets of his subject with his typical enthusiasm.
