The first Fire Island Lighthouse was constructed in 1826 after numerous shipwrecks along the barrier island. A replacement tower built in 1858 incorporated innovations in lighthouse design such as the Fresnel lens. Vessels anchored offshore, known as lightships, augmented the lighthouse for many years. The Coast Guard shut down the site in 1973. Through the efforts of the Fire Island Lighthouse Preservation Society and the National Park Service, the beautiful structure was meticulously restored and the tower relit in 1986. Along with a selection of wonderful color photographs depicting the grandeur of the lighthouse, author Bill Bleyer charts the history of Long Island's cherished Fire Island Lighthouse.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Winner of the 2012 Randolph Caldecott Medal This New York Times Bestseller and New York Times Best Illustrated Book relates a story about love and loss as only Chris Rashcka can tell it. Any child who has ever had a beloved toy break will relate to Daisy's anguish when her favorite ball is destroyed by a bigger dog. In the tradition of his nearly wordless picture book *Yo! Yes?*, Caldecott Medalist Chris Raschka explores in pictures the joy and sadness that having a special toy can bring. Raschka's signature swirling, impressionistic illustrations and his affectionate story will particularly appeal to young dog lovers and teachers and parents who have children dealing with the loss of something special.

This open access book discusses the impact of human-induced global climate change on the regional climate and monsoons of the Indian subcontinent, adjoining Indian Ocean and the Himalayas. It documents the regional climate change projections based on the climate models used in the IPCC Fifth Assessment Report (AR5) and climate change modeling studies using the IITM Earth System Model (ESM) and CORDEX South Asia datasets. The IPCC assessment reports, published every 6–7 years, constitute important reference materials for major policy decisions on climate change, adaptation, and

mitigation. While the IPCC assessment reports largely provide a global perspective on climate change, the focus on regional climate change aspects is considerably limited. The effects of climate change over the Indian subcontinent involve complex physical processes on different space and time scales, especially given that the mean climate of this region is generally shaped by the Indian monsoon and the unique high-elevation geographical features such as the Himalayas, the Western Ghats, the Tibetan Plateau and the adjoining Indian Ocean, Arabian Sea, and Bay of Bengal. This book also presents policy relevant information based on robust scientific analysis and assessments of the observed and projected future climate change over the Indian region.
