Income Eligibility | **The LIHEAP Clearinghouse**

LIHEAP guidelines for eligibility can vary by state. In most states, you will be required to prove that you are a state resident and that you are in need of assistance to pay your utility bills. You may also be required to submit copies of your utility bills to show how much your household usually pays per month.

Health Insurance is a Family Matter is the third of a series of six reports on the problems of uninsurance in the United Sates and addresses the impact on the family of not having health insurance. The book demonstrates that having one or more uninsured members in a family can have adverse consequences for everyone in the household and that the financial, physical, and emotional well–being of all members of a family may be adversely affected if any family member lacks coverage. It concludes with the finding that uninsured children have worse access to and use fewer health care services than children with insurance, including important preventive services that can have beneficial long-term effects.

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America’s future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children’s ability to grow and achieve adult success, hurting them and the broader society. A Roadmap to Reducing Child Poverty reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

An official, up-to-date government manual that covers everything from VA life insurance to survivor benefits. Veterans of the United States armed forces may be eligible for a broad range of benefits and services provided by the US Department of Veterans Affairs (VA). If you’re looking for information on these benefits and services, look no further than the newest edition of Federal Benefits for Veterans, Dependents, and Survivors. The VA operates the nation’s largest health-care system, with more than 1,700 care sites available across the country. These sites include hospitals, community clinics, readjustment counseling centers, and more. In this book, those who have honorably served in the active military, naval, or air service will learn about the services offered at these sites, basic eligibility for health care, and more. Helpful topics described in depth throughout these pages for veterans, their dependents, and their survivors include: Vocational rehabilitation and employment VA pensions Home loan guaranty Burial and memorial benefits Transition assistance Dependents and survivors health care and benefits Military medals and records And more

Hidden Cost, Value Lost, the fifth of a series of six books on the consequences of uninsurance in the United States, illustrates some of the economic and social losses to the country of maintaining so many people without health insurance. The book explores the potential economic and societal benefits that could be realized if everyone had health insurance on a continuous basis, as people over age 65 currently do with Medicare. Hidden Costs, Value Lost concludes that the estimated benefits across society in health years of life gained by providing the uninsured with the kind and amount of health services that the insured use, are likely greater than the additional social costs of doing so. The potential economic value to be gained in better health outcomes from uninterrupted coverage for all Americans is estimated to be between \$65 and \$130 billion each year.
