Madras University Updated On - October 20th 2020, Updated By - mukesh Madras University Admission Process 2020: University offers admission in the Postgraduate courses, Research courses, Diploma and Certificate courses in various fields such as Science, Commerce, Arts, and Management. They provide Undergraduate courses only in Distance education.

Chapters cover the history of librarianship, national libraries, academic libraries, public libraries, school libraries, and special libraries, as well as the state of bibliographic control and services, library education, and professional organizations in India.

Education has become the number one demanded commodity for social and economic transformation for both developing and developed economies. Thus the number of persons going and returning to school has become too big to be handled by existing brick and mortar learning institutions. Besides, the majority of lifelong learners do not have the time to become full-time students. Distance education is becoming the solution to the aforementioned challenges. It has been defined as the mode of study where the learner is separated in time and space from the institution and tutors providing the tuition.

The evolution of distance education in India in forms of dual mode, single mode and consortia has been phenomenal. The system today is one of the largest distance education networks in the world comprising dual mode university distance education institutes, single mode open universities, dual mode secondary education, single mode open schools, distance education council/consortium, and many private and semi-government providers of education and training. The four generations of distance education have been implemented in a variety of forms and models, and the system exhibits adoption of innovative practices in course design, development, delivery, evaluation, media networking, and planning and management which have proved effective in addressing the issues of access and equity, economy, quality and reform in the country, and which have been adapted/emulated by a host of such systems in the developing world. It is, therefore, imperative at this stage to reflect on the developments of above four decades of distance education in this country, and map its future expansion. Each chapter in the volume reflects on the concerned theme covering the distance education system in the country, traces the limitations and adoption of innovative strategies to address the issues, and introspect on its future possibilities.
